Spatial Approaches in African Archaeology Cameron Gokee, Carla Klehm, 2023-01-01

This book explores the interplay between African archaeology and geospatial methods from three broad perspectives First several contributors examine the technical possibilities and limits of using satellite imagery to detect archaeological sites and model their physical environs A second perspective is the integration of new geospatial data and methods into site and landscape scale analyses to better address questions about social organization and subjective experience in African pasts A final perspective considers the interplay between geospatial technologies and community archaeology in Africa Recognizing that GIS and RS supersede traditional divisions in African archaeology such as different periods geographic regions and theoretical orientations the chapters aim to be widely applicable Arranged by methodological emphasis the case studies move from technical discussions of specific geospatial tools to general applications for addressing specific sociohistorical topics Each chapter clearly explains the links between their archaeological questions and analytical methods as well as how their results advance our understanding of African pasts and heritage resources Many of the chapters can serve as learning models for archaeologists who are new to GIS or curious about its applications to their work Others represent recent

Meteorological Disasters in Medieval Britain (AD 1000–1500) Peter J. Brown,2023-08-21 When high magnitude meteorological hazards impact vulnerable human populations disasters are the inevitable consequence Through archaeological and historical evidence this book investigates how these sudden and unpredictable events affected British medieval populations AD 1000 1500 Medieval society understood disasters in a practical sense and took steps to minimise risk by constructing flood defences and reinforcing structures damaged by storms At the same time natural hazards were widely interpreted through a framework of religious and superstitious beliefs and a wide variety of measures were followed to secure protection against the dangers of the natural world Disasters therefore were interpreted through a duality of understanding in which their occurrence could be the result of spiritual or superstitious triggers but practical solutions were a key component in mitigating their tangible impacts In evaluating this duality this book focuses on specific case studies and considers both their diverse historical contexts as well as their consequences for society against the backdrop of significant

Remote Sensing and Geosciences for Archaeology Deodato Tapete, 2018-04-27 This book is a printed edition of the Special Issue Remote Sensing and Geosciences for Archaeology that was published in Geosciences Revolution, Counterrevolution and Assassination After World War II Robert C.

Cottrell, 2024-12-05 In response to the upheavals engendered by World War II revolutions broke out or loomed throughout the world Nationalist aspirations proved global in nature ironically empowered by the Cold War In Asia the Middle East Latin America and Africa revolutions and counterrevolutions proliferated and similar disruptions threatened to unfold in Europe and North America Social upheavals began to occur in Vietnam Mandatory Palestine China Algeria Ghana and Cuba Conservative and reactionary forces frequently pushed back quashing hopeful developments like the Guatemalan Spring the Hungarian Revolution and the Prague Spring while also readily resorting to the murder of leading progressive figures from Gandhi to Navalny The second volume of this detailed history explores the rippling effects of World War II across the globe including countries experiencing colonial or neocolonial relationships This book examines the interplay between modern revolutionary movements and campaigns seeking to prevent such movements or to reestablish a history and time that never really existed It also traces the deadly resort to politically motivated killings which cut short the lives of so many distinguished sometimes beloved figures whose loss is still felt decades later

Media Practices and Changing African Socialities Jo Helle-Valle, Ardis Storm-Mathisen, 2020-03-01 Deriving from innovative new work by six researchers this book questions what the new media's role is in contemporary Africa The chapters are diverse covering different areas of sociality in different countries but they unite in their methodological and analytical foundation The focus is on media related practices which require engagement with different perspectives and concerns while situating these in a wider analytical context The contributions to this collection provide fresh ethnographic descriptions of how new media practices can affect socialities in significant but unpredictable ways

Archaeological 3D GIS Nicolò Dell'Unto, Giacomo Landeschi, 2022-02-06 Archaeological 3D GIS provides archaeologists with a guide to explore and understand the unprecedented opportunities for collecting visualising and analysing archaeological datasets in three dimensions With platforms allowing archaeologists to link query and analyse in a virtual georeferenced space information collected by different specialists the book highlights how it is possible to re think aspects of theory and practice which relate to GIS It explores which questions can be addressed in

such a new environment and how they are going to impact the way we interpret the past By using material from several international case studies such as Pompeii and as well as prehistoric and protohistoric sites in Southern Scandinavia this book discusses the use of the third dimension in support of archaeological practice This book will be essential for researchers and scholars who focus on archaeology and spatial analysis and is designed and structured to serve as a textbook for GIS and digital archaeology courses The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Perspectives on Public Policy in Societal-Environmental Crises Adam Izdebski, John Haldon, Piotr Filipkowski, 2022-07-14 This is an open access book Histories we tell never emerge in a vacuum and history as an academic discipline that studies the past is highly sensitive to the concerns of the present and the heated debates that can divide entire societies But does the study of the past also have something to teach us about the future Can history help us in coping with the planetary crisis we are now facing By analyzing historical societies as complex adaptive systems we contribute to contemporary thinking about societal environmental interactions in policy and planning and consider how environmental and climatic changes whether sudden high impact events or more subtle gradual changes impacted human responses in the past We ask how societal perceptions of such changes affect behavioral patterns and explanatory rationalities in premodernity and whether a better historical understanding of these relationships can inform our response to contemporary problems of similar nature and magnitude such as adapting to climate change
