Who Is an African? Roderick R. Hewitt, Chammah J. Kaunda, 2018-09-15 The subject of race and identity is a burning issue which continues to occupy the attention not only of South Africans but also the wider residents of the continent of Africa and those who are Africans in the Diaspora The outburst of xenophobic attacks against foreigners mostly of Black African origins in some communities of Kwa Zulu Natal and areas of Johannesburg during 2008 and 2015 has

raised questions about the social cohesion of South African society linked to unresolved structural identity issues bequeathed by the nation's past colonial and apartheid legacy. This publication argues that there is an embedded schizophrenic identity crisis within the society that requires scholarly interrogation. The chapters assemble scholarly voices from different ethnic groups that examine the central research question of this study: Who is an African? Within the wider Southern African context, identity and ethnicity politics are framing nationalist economic policies and are impacting on social cohesion within many countries. Writing from different social and racial locations, the authors have critically engaged with the central question and offer some important insights that can serve as a resource for all nations grappling with issues of race, ethnicity, identity, constructed politics, and social cohesion.

Recalibrating teacher training in African higher education institutions

Sifiso Sibanda, Gideon (Deon) P. van Tonder, Washington T. Dudu, 2023-03-01. This book critically examines the role of governments in promoting parity during and in post-pandemic education. This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research-intensive institutions of higher learning. This has far-reaching implications for the education of underprivileged citizens and education, particularly modes and modalities of delivery, has to be reimagined to subvert the challenges wrought by the pandemic. This book significantly bridges the gap between the pre and post-COVID-19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time. The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark.

Insights into Policies and Practices on the Right to Development

Carol Chi Ngang, Serges Djoyou Kamga, 2020-10-06. As the world continues to grapple with a range of practical development challenges that are directly linked to livelihood concerns about human well-being and declining living standards, often overlooked is the human right to development which remains largely unfulfilled. In the face of successive global initiatives seeking to remedy these challenges, it has become urgent to ask what the universal recognition of the right to development implies if it cannot be translated into improved well-being for impoverished peoples around the world. The contributors in this timely volume argue that setbacks to development are deeply rooted in the failure to implement the right to development which, by nature, guarantees equality of opportunities and equitable redistribution of the resources that contribute to better living standards. Assessing policy and practical measures or the lack thereof, they offer practical suggestions for implementation that will make the right to development a reality for everyone.
