Harrod, Debra L. Martin, 2013-11-12 The goal of this monograph is to emphasize with empirical data the complexity of the relationship between climate change and violence. Bioarchaeology is the integration of human skeletal remains from ancient societies with the cultural and environmental context. Information on mortality disease diet and other factors provide important data to examine long chronologies of human existence particularly during periods of droughts and life threatening climate changes. Case studies are used to reconstruct the responses and short and long term adaptations made by groups before during and after dramatic changes in weather and climate. Interpersonal and group violence is also analyzed. The authors find that while in some cases there is an increase in trauma and violence in other cases there is not. Human groups are capable of avoiding violent altercations and increasing broad networks of cooperation that help to mitigate the effects of climate change. A case study from the U.S. Southwest is provided that shows the variable and surprising ways that ancient farmers in the past dealt with long term droughts **The Shining Ones Ambassadors of a New Age of Light** DeAnne Hampton, 2013-01-30 The Shining Ones are known throughout the Cosmos as Master Geneticists they carry the higher octave harmonics of humanity's attunement to a 5D World. The 8 Calendars of the Maya Hunbatz Men, 2009-12-29 Mayan daykeeper Hunbatz Men reveals the multi calendar system of the Maya that guided the lives of his ancestors and how it can guide us today. The first book to reveal the secrets of the Mayan Pleiades calendar the Tzek'eb Explains how the Maya used their astronomical knowledge to guide their lives on Earth. The Mayan Calendar has taken on special prominence with the imminent arrival of 2012 a date that many claim is the end of that calendar. However as Mayan elder and daykeeper Hunbatz Men shows the cosmological understanding of his ancestors was so sophisticated that they had not one but many calendars each based on the cycles of different systems in the

cosmos In this book he reveals for the first time the Tzek eb or Pleiades Calendar of 26 000 years which charts the revolution of our solar system around Alcyone the central star of the Pleiades system He also discusses the K uuk ulcan Calendar of the 4 seasons of the solar year and the wheel of the K altunes Calendar which is composed of 13 cycles of 20 years each that form a calendar of 260 years In traditional Mayan culture the computation of time was not determined by simple economic or social motives The calendars served the higher purpose of synchronizing the lives of human beings and their societies to the great cosmic pulsation to the rhythm of the annual seasons and to the other cycles that dictate changes upon Earth Mayan understanding of the cosmic cycles was so exact that this knowledge could be used to influence all stages of life from planning when to conceive parents could choose not only the sex of their child but its vocation and future destiny to plotting out the course of the entire society Pyramids played a crucial role in applying this wisdom because as Hunbatz Men shows they were able to produce and transform energy in accordance with the cosmic cycles charted by the calendars This book reveals for the first time the wisdom of the multi calendar Mayan system and how it can help guide our modern world
