**Modern Bunkers** Charles Nehme, In today's ever-changing world, the concept of security takes on new dimensions. Whether it's the looming threat of natural disasters, the specter of man-made catastrophes or the unpredictable nature of global politics, the need for a safe haven has never been more pressing. In this book, we delve into the realm of fortified shelters designed to withstand the most formidable challenges of our time. From underground sanctuaries to aboveground fortresses, we explore the intricacies of creating spaces that offer not just protection but also sustainability, self-sufficiency and comfort. The idea of bunkers may conjure images of doom and gloom, but our aim here is not to indulge in fearmongering. Instead, we seek to empower our readers with knowledge, knowledge of the threats we face, the technologies available to mitigate them and the strategies for ensuring survival in the face of adversity. Throughout these pages, you'll find a comprehensive exploration of modern bunker design and construction, informed by the latest advances in engineering, architecture and security. We'll also delve into the psychological aspects of shelter living, the legal and ethical considerations of bunker ownership and the importance of community resilience in times of crisis. Whether you're a survival enthusiast, a concerned citizen or a policymaker tasked with ensuring public safety, this book is intended to serve as a valuable resource. It is a testament to the human capacity for adaptation and innovation in the face of adversity and a reminder that even in the darkest of times, there is hope to be found in preparedness and resilience. Welcome to the world of modern bunkers, where safety meets sustainability and where the quest for security is matched only by the human spirit's determination to endure.

**98.6 Degrees** Cody Lundin, 2020-05-29 From the survival instructor and author of *When All Hell Breaks Loose*, a guide to surviving fear, panic and the biggest outdoor killers. Cody Lundin, director of the Aboriginal Living Skills School in Prescott, Arizona, shares his own brand of wilderness wisdom in this highly anticipated new book on commonsense modern survival skills for the backcountry, the backyard or the highway. It is the ultimate book on how to stay alive based on the principal of keeping the body's core temperature at a lively 98.6 degrees. In his entertaining and informative style, Cody stresses that a human can live without food for weeks and without water for about three days or so. But if the body's core temperature dips much below or above the 98.6 degree mark, a person can literally die within hours. It is a concept that many don't take seriously or even consider, but knowing what to do to maintain a safe core temperature when lost in a blizzard or in the desert could save your life. Lundin delivers the message with wit, rebellious humor and plenty of backcountry expertise. Excellent advice, the obvious product of a man who has gone and done it well, worth reading. *Field Stream*.
