

The Necklace

SHE was one of those not so pretty and charming girls, born by a blunder of destiny in a family of school administrators. She had no ability, no sympathy, no means of being known, understood, loved, married. She was sad since she could not be the dictator of a third-world country; she was unhappy as though kept out of her own destiny of Inquisition executor; so she became your principal and is looking forward to evaluating you tomorrow.

You better have your ela common core lesson plans ready.

Personification in the Greek World Judith Herrin, 2017-07-12 Personification the anthropomorphic representation of any non human thing is a ubiquitous feature of ancient Greek literature and art Natural phenomena earth sky rivers places cities countries divisions of time seasons months a lifetime states of the body health sleep death emotions love envy fear and political concepts victory democracy war all appear in human usually female form Some have only fleeting incarnations others become widely recognised figures and others again became so firmly established as deities in the imagination of the community that they received elements of cult associated with the Olympian gods Though often seen as a feature of the Hellenistic period personifications can be found in literature art and cult from the Archaic period onwards with the development of the art of allegory in the Hellenistic period they came to acquire more intellectual overtones the use of allegory as an interpretative tool then enabled personifications to survive the advent of Christianity to remain familiar figures in the art and literature of Late Antiquity and beyond The twenty one papers presented here cover personification in Greek literature art and religion from its pre Homeric origins to the Byzantine period Classical Athens features prominently but other areas of both mainland Greece and the Greek East are well represented Issues which come under discussion include problems of identification and definition the question of gender the status of personifications in relation to the gods the significance of personification as a literary device the uses and meanings of personification in different visual media personification as a means of articulating place time and worldly power The papers reflect the enormous range of contexts in which personification occurs indicating the ubiquity of the phenomenon in the ancient Greek world

Personification Walter Melion, Bart Ramakers, 2016-03-11 Personification or prosopopeia the rhetorical figure by which something not human is given a human identity or face is readily discernible in early modern texts and images but the figure's cognitive form and function its rhetorical and pictorial effects have rarely elicited sustained scholarly attention The aim of this volume is to formulate an alternative account of personification to demonstrate the ingenuity with which this multifaceted device was utilized by late medieval and early modern authors and artists in Italy France England Scotland and the Low Countries Personification is susceptible to an approach that balances semiotic analysis focusing on meaning effects and phenomenological analysis focusing on presence effects produced through bodily performance This dual approach foregrounds the full scope of prosopopoeic discourse not just the what but also the how not only the signified but also the signifier

Machines of the Mind Katharine Breen, 2021-05-11 In *Machines of the Mind* Katharine Breen proposes that medieval personifications should be understood neither as failed novelistic characters nor as instruments of heavy handed didacticism She argues that personifications are instead powerful tools for thought that help us to remember and manipulate complex ideas testing them against existing moral and political paradigms Specifically different types of medieval personification should be seen as corresponding to positions in the rich and nuanced medieval debate over universals Breen identifies three different types of personification Platonic Aristotelian and Prudentian that gave medieval writers a surprisingly varied spectrum with which to paint their characters Through a series of new readings of major authors and works from Plato to Piers Plowman Breen illuminates how medieval personifications embody the full range of positions between philosophical realism and nominalism varying according to the convictions of individual authors and the purposes of individual works Recalling Gregory the Great's reference to *machinae mentis* machines of the mind Breen demonstrates that medieval writers applied personification with utility and subtlety employing methods of personification as tools that serve different functions *Machines of the Mind* offers insight for medievalists working at the crossroads of religion philosophy and literature as well as for scholars interested in literary character building and gendered relationships among characters readers and texts beyond the Middle Ages

Power, Patronage, and Memory in Early Islam Alain George, Andrew Marsham, 2018 When the Umayyads the first Islamic dynasty rose to power shortly after the death of the Prophet Muhammad d 632 the polity of which they assumed control had only recently expanded out of Arabia into the Roman eastern Mediterranean Iraq and Iran A century later by the time of their downfall in 750 the last Umayyad caliphs governed the largest empire that the world had seen stretching from Spain in the West to the Indus valley and Central Asia in the East By then their dynasty and the ruling circles around it had articulated with increasing clarity the public face of the new monotheistic religion of Islam created major masterpieces of world art and architecture some of which still stand today and built a state apparatus that was crucial to ensuring the continuity of the Islamic polity Within the vast lands under their control the Umayyads and their allies ruled over a mosaic of peoples languages and faiths first among them Christianity Judaism and the Ancient religion of Iran Zoroastrianism The Umayyad period is profoundly different from ours yet it also resonates with modern concerns from the origins of Islam to dynamics of cultural exchange Editors Alain George and Andrew Marsham bring together a collection of essays that shed new light on this crucial period Power Patronage and Memory in Early Islam elucidates the ways in which Umayyad elites fashioned and projected their self image and how these articulations in turn mirrored their own times The authors combining perspectives from different disciplines present new material evidence introduce fresh perspectives about key themes and monuments and revisit the nature of the historical writing that shaped our knowledge of this period
