European Social Movements and the Transnationalization of Public Spheres Angela Bourne, 2018-12-07 Many contemporary social movements observe, copy, learn from, coordinate and cooperate with other movements abroad and some mobilise to influence processes of global governance. Can these transnational dimensions of mobilization transform the territorial scale of political debate on issues of common concern in public spheres? In contrast to many existing studies which focus on the media as

carriers of public sphere transnationalisation this book presents a theoretical and empirical exploration of the role of social movements in such processes As arenas or subaltern counterpublics in themselves social movements may provide a setting in which activists come to frame claims in a comparative manner interact with activists from other countries frame problems as matters of transnational concerns or consider themselves members of transnational communities As actors social movements may contribute to the transnational transformation of public spheres by directing claims to political authorities beyond the state claiming to represent transnational constituencies and focus on similar issues and use similar frames of reference as movements abroad The book s case studies addressing efforts to build transnational social movements and transnational dimensions of anti austerity and prodemocracy movements in Spain Portugal Greece Turkey and Ireland provide contemporary empirical illustrations of such processes at work The chapters were originally published in a special issue of the Journal of Civil Society
