Heritage, Affect and Emotion Divya P. Tolia-Kelly, Emma Waterton, Steve Watson, 2016-07-01 Heritage and its economies are driven by affective politics and consolidated through emotions such as pride awe joy and pain In the humanities and social sciences there is a widespread acknowledgement of the limits not only of language and subjectivity but also of visibility and representation Social scientists particularly within cultural geography and cultural studies have recently attempted to define and understand that which is more than representational through the development of theories of affect assemblage post humanism and actor network theory to name a few While there have been some recent attempts to draw these lines of thinking more forcefully into the field of heritage studies this book focuses for the first time on relating heritage with the politics of affect The volume argues

that our engagements with heritage are almost entirely figured through the politics of affective registers such as pain loss joy nostalgia pleasure belonging or anger It brings together a number of contributions that collectively and with critical acuity question how researchers working in the field of heritage might begin to discover and describe affective experiences especially those that are shaped and expressed in moments and spaces that can be at times intensely personal intimately shared and ultimately social It explores current theoretical advances that enable heritage to be affected released from conventional understandings of both heritage as objects and objects as representations by opening it up to a range of new meanings emergent and formed in moments of encounter Whilst representational understandings of heritage are by no means made redundant through this agenda they are destabilized and can thus be judged anew in light of these developments Each chapter offers a novel and provocative contribution provided by an interdisciplinary team of researchers who are thinking theoretically about affect through landscapes practices of commemoration visitor experience site interpretation and other heritage work

Calling on the Community Jeroen Rodenberg, Pieter Wagenaar, Gert-Jan Burgers, 2023-01-13 There is a call in Heritage Studies to democratize heritage practices and place local communities at the forefront heritage plays an important role in identity formation and therefore in social inclusion and exclusion Public participation is often presented as the primary means to prioritize communities However studies focusing on public participation are typically descriptive in nature and lack a strong analytical framework that enables us to understand participation The essays in this volume apply Public Administration theory to collaborative governance and thus contribute to a better understanding of public participation in the heritage sector
