Zak, 2012-05-10 A Revolution in the Science of Good and Evil Why do some people give freely while others are cold hearted Why do some people cheat and steal while others you can trust with your life Why are some husbands more faithful than others and why do women tend to be more generous than men Could the key to moral behavior lie with a single molecule From the bucolic English countryside to the highlands of Papua New Guinea from labs in Switzerland to his campus in Southern California Dr Paul Zak recounts his extraordinary stories and sets out for the first time his revolutionary theory of moral behavior Accessible and electrifying *The Moral Molecule* reveals nothing less than the origins of our most human qualities empathy happiness and the kindness of strangers *The Moral Molecule* Paul J. Zak, 2013-11-26 Philosophy economics and biology have rarely been so entertaining Matt Ridley author of *Genome* Paul J. Zak's proclivity for taking blood samples has earned him a nickname as the vampire economist But his sanguinary habit is backed by his scientific quest What if there was a master switch for human behavior On and people are loving and generous Off and they revert to violence and greed By studying thousands of blood samples Zak has pinpointed just such a switch a brain chemical called oxytocin Sprinting around the globe and into the human brain *The Moral Molecule* is a dazzling narrative as erudite and entertaining as bestsellers like *Flow Drive* and *Why We Love* *The Brain-Friendly Workplace* Friederike Fabritius, 2022-10-11 WALL STREET JOURNAL BESTSELLER A smart science based approach to retaining your talent and making the world of work a better place Today's work isn't working Stress and burnout are driving talented professionals out of the workforce while the corporate standard of extreme hours sleep deprivation and nonstop travel proves unsustainable But innovative leaders are using this once in a century opportunity to create a future of work that's better for everyone The workplace of tomorrow is a hybrid ecosystem that thrives on flexibility and diversity of thought enabling all employees to reach peak performance Every person's brain is different and by taking an inclusive view towards neurosignature diversity organizations can get a competitive advantage In *The Brain Friendly Workplace* Friederike Fabritius offers a science based and field tested blueprint for tomorrow's workplace Leaders capable of enacting change or individuals searching for ways to work smarter will discover that even small and inexpensive changes can lead to advantages like better employee performance higher job satisfaction and stronger talent retention If you have been longing for a better way of working where you and your people are both happy and productive *The Brain Friendly Workplace* can make that vision a reality **Love: A Good Medicine (The Saga of the Elixir of Life) (Introducing 'LoveOlogy')** Dr. Siddhartha Ganguli, 2024-01-15 The human emotion of love has its own spectrum like the rainbow with its two extremes represented by two different neurochemicals Dopamine Smart Love Short lived or Short Love and Oxytocin Sustained Love In the ancient Indian Natya Shastra of the great Bharata Muni the essence or rasa of love is Sringara having at its two poles Kama lust and Prema pure love As illustrations of the Sringara rasa the author has analysed a number of love song lyrics from different cultures In this book

while the author has looked at and analysed love from the angles of bio medical social psychological and neurological sciences one unique concept shared is that of the love pie A very special section deals with Futuristic Love where the author has discussed the idea of having a love relationship with AI Artificial Intelligence Special contributions by the Stellar Maestro world famous polymath musician astrophysicist philosopher painter Dr Leonid Timoshenko of Russia and the top ranking gynaecologist and obstetrician Dr Gouri Kumra from India are precious value additions **The Art of Compassionate**

Business Bruno R. Cignacco,2023-12-01 There are several well ingrained assumptions regarding the dynamics of work and business activities which can be refuted Some examples of these widespread assumptions in business and work environments are employees being viewed as commodities competitors perceived as threats companies resources seen as limited and customers perceived as scarce and difficult All this leads to the question Is there a way to perform business activities more humanely The second edition of this book challenges the reader to change the way they perform in business situations and become more focused on the human aspects of business activities The users of this knowledge and those affected by them will undergo a profound transformation in the way they perform business activities They will benefit from gradually testing and implementing the guidelines conveyed in this book both in the business environment and in the workplace When readers put these principles into practice positive ripple effects are bound to affect other stakeholders of the organisation they work for or own The author has refreshed all the concepts and examples introduced in the first edition which include aspects related to mission and vision passion business mindset organisational learning improvement of business conversations use of constructive criticism and betterment of relationships with the most relevant stakeholders customers suppliers intermediaries community employees etc The author also includes a discussion of creativity and the innovation process as well as other relevant aspects related to a healthy business environment and provides various real life examples of companies which have adopted a loving attitude towards their stakeholders which has become so important in the current business environment **The Art of Understanding Your Building's Personality** Wayne P. The Four Moons in the Human Body Dr. Siddhartha Ganguli, 2023-10-12 The Bauls Fakirs of Bengal and Bangladesh certainly constitute a breed different from other ethnic religious sects They do not believe in worshipping in any citadel of religion like a temple a mosque or a church They have the conviction that the body itself is the habitat of cosmic energy and also that the entire cosmos is present in a living body They compare the body with a cage and the soul with an unknown bird which has come to stay for some time only Most of the Bauls who are not just singers but serious followers of the Baul path do not believe in replication creating any future progeny They adopt special procedures for sexual union with menstruated female partners to retain the semen without losing it To learn this very special technique which they do not share with any one they have to take the help of learned and experienced Gurus who also teach them weird rituals like Chari Chandra Bhed which involves consumption of semen menstrual blood urine and faeces These folk medicine practices help them to keep diseases away and maintain good health There have been lot of surveys and studies on the Bauls Fakirs primarily of historical religious and sociological nature This book goes a little deep to look at their songs lifestyle philosophy practices from biological psychological management angles to establish that the Baulsphere is based on concepts and practices that have been proven scientific from modern research studies
