**Social Identity and Working Class Support for the Populist Radical Right** Eric G. Castater, Kyung Joon Han, 2025-02-04 Why are blue collar workers increasingly supporting the populist radical right in Western Europe Previous explanations for this phenomenon suggest that it is the result of their economic and cultural grievances and their general discontent towards the political system *Social Identity and Working Class Support for the Populist Radical Right* argues that these explanations are unable to account for why the working class despite their deteriorating economic position in recent decades would prefer to vote for a party family that they agree with more on cultural issues the populist radical right than economic issues the populist radical or mainstream left To explain this puzzle the book develops a theory utilizing the literature on social identity It argues and empirically finds

that political and economic conditions relatively unfavourable to the working class increase blue collar worker support for the populist radical right in Western Europe by strengthening these workers national identity and thus also the salience they place on cultural issues Castater and Han s analysis suggests that if governing parties desire to reduce support for the populist radical right they should incorporate labour organizations into the welfare state reform process enact economic policies that improve the well being of a broad swath of the working class and reduce the types of economic inequality that most affect blue collar workers

burden sharing among nations Glanville considers how states should support this responsibility whether it can be coherently codified in law the extent to which states have embraced their responsibilities and what might lead them to do so more reliably in the future Sharing Responsibility wrestles with how countries should care for imperiled people and how the ideal of the responsibility to protect might inspire just behavior in an imperfect and troubled world *The Beginnings of Jewishness* Shaye J. **The Fifth Dimension** Michael Cole, Distributive Literacy Consortium, 2006-10-19 The significant increase in the number of working mothers over the last twenty years has

led to widespread worries about the plight of latchkey kids who return from school each day to empty homes. Concerned that unsupervised children might be at greater risk of delinquency, schools and communities across the nation began providing after school activities. But many of these programs were hastily devised with little understanding of what constitutes a quality program that meets children's developmental needs. The Fifth Dimension explores and evaluates one of the country's most successful and innovative after school programs, providing insightful and practical lessons about what works and doesn't work after school. The Fifth Dimension program was established in the 1980s as a partnership between community centers and local colleges to establish an educational after school program. With an emphasis on diversity and computer technology, the program incorporates the latest theories about child development and gives college students the opportunity to apply their textbook understanding of child development to real learning environments. The Fifth Dimension explores the design, implementation, and evaluation of this thriving program. The authors attribute the success of the Fifth Dimension to several factors. First, the program offers a balance of intellectually enriching exercises with development-enhancing games. Second, by engaging undergraduates as active participants in both learning and social activities, the program gives local community organizations a large infusion of high-quality help for their educational efforts. Third, by rewarding children for their achievements and good behavior with greater flexibility in choosing their own schedules, the Fifth Dimension acts as a powerful, enduring motivator. The Fifth Dimension program serves as a model for what an enriching after school program can be. The product of years of innovation and careful assessment, The Fifth Dimension is a valuable resource for all who are interested in developing successful community-based learning programs.
