pg. 1 Introduction

Welcome to the world-wide family of Volvo owners. We trust that you will enjoy many years of safe driving in your Volvo, an automobile designed with your safety and comfort in mind. User Experience Design in the Era of Automated Driving Andreas Riener, Myounghoon Jeon, Ignacio

Alvarez, 2022-01-01 This book is dedicated to user experience design for automated driving to address humane aspects of automated driving e.g. workload, safety, trust, ethics, and acceptance. Automated driving has experienced a major development boost in recent years. However, most of the research and implementation has been technology driven rather than human centered. The levels of automated driving have been poorly defined and inconsistently used. A variety of application scenarios and restrictions has been ambiguous. Also, it deals with human factors, design practices, and methods as well as applications such as multimodal infotainment, virtual reality, augmented reality, and interactions in and outside users. This book aims at 1) providing engineers, designers, and practitioners with a broad overview of the state of the art user experience research in automated driving to speed up the implementation of automated vehicles and 2) helping researchers and students benefit from various perspectives and approaches to generate new research ideas and conduct more integrated research.

Larry Light and Joan Kiddon, the leaders of Arcature LLC, consultants in brand management, examine societal changes and global, local, and personal forces through the lens of marketers. They explain how to leverage paradox promises into brand-focused strategies and actions that create a pathway to profitability, create extraordinary brand experiences for individuals and communities, and build strong brands in a world of contradictory needs and benefits. In today's world, people want their individuality to be recognized but they also want to belong to a group that shares their distinctiveness.
