Potential Images Dario Gamboni, 2002 In Potential Images Dario Gamboni explores ambiguity in modern art considering images that rely to a great degree on a projected or imaginative response from viewers to achieve their effect Ambiguity became increasingly important in late 19th and early 20th century aesthetics as is evidenced in works by such artists as Redon Cezanne Gauguin Ensor and the Nabis Similarly the Cubists subverted traditional representational conventions requiring their viewers to decipher images to extract their full meanings The same device was taken up in the various experiments leading to abstraction For example it was Kandinsky's intention that his work could be interpreted in both figurative and non figurative ways and Duchamp's Readymades suggested the radical conclusion that it is the beholder who makes the picture These invitations to viewers to participate in the process of artistic communication had social and political implications as they accorded artist and beholder symmetrical almost interchangeable roles
