The book presents insights into the psychological processes that are at work when pupils and teachers share decision making and how this can harness and increase motivation for teachers and their pupils. Combining both theory and examples of practice this book provides clarity about the impact of collaborative decision making and how it can help pupils to take ownership of their classrooms and promote greater cooperation and productivity. This book draws on 25 stories from Dr Rowe's own study and experiences as an educational psychologist and the accounts of other educators and researchers shows how teachers and school leaders have overcome some common hurdles that those in conventional schools might encounter provides research evidence and practical examples from real life classrooms that will inspire teachers teaching assistants and school leaders. Written by a highly experienced educational psychologist this companion guide will help teachers head teachers teacher educators and student teachers to transform achievement behaviour and motivation through greater collaboration with their pupils.
