the Environment University of Oxford shrewdly combines environmental and social history beginning with the earliest civilizations of sedentary farmers on the banks of the Nile the Tigris and the Euphrates Rivers Even as he describes how these societies were made possible by sea level changes from the last glacial melt he incisively examines how this type of farming led to irrigation and multiple cropping which in turn led to a population explosion and labor specialization We see with clarity how irrigation's structure informed social structure inventions such as the calendar sprung from agricultural necessity how in ancient Greece the communal ownership of wells laid the groundwork for democracy how the Greek and Roman experiences with water security resulted in systems of taxation and how the modern world as we know it began with a legal framework for the development of water infrastructure Extraordinary for its monumental scope and piercing insightfulness *Water A Biography* richly enlarges our understanding of our relationship to and fundamental reliance on the most elemental substance on earth

Schools and

Societies Steven Brint, 2017-01-04 *Schools and Societies* provides a synthesis of key issues in the sociology of education focusing on American schools while offering a global comparative context. Acknowledged as a standard text in its first two editions, this fully revised and updated third edition offers a broader sweep, stronger theoretical foundation, and a new concluding chapter on the possibilities of schooling. Instructors, students, and policymakers interested in education and society will find all quantitative data up to date and twenty percent more material covering advances in research since the last edition. This book is distinguished from others in the field by its breadth of coverage, compelling institutional history, and lively prose style. It opens with a chapter on schooling as a social institution. Subsequent chapters compare schooling in industrialized and developing countries and discuss the major purposes of schooling: transmitting culture, socializing young people, and sorting youth for class locations and occupations. The penultimate chapter looks at school reform efforts drawing for the first time on comparative studies. A new coda ends the book by considering the educational ideals schools should strive for and how they might be attained. This third edition of *Schools and Societies* delivers the accessible explanations instructors rely on, with updated, expanded information that is even more relevant for students.
