Third Series** Library of Congress. Copyright Office,1972 Hot Springs Drive Lindsay Hunter,2023-11-07 The third title in Roxane Gay Books inaugural list Hot Springs Drive is an urgent vicious blade of a novel about a shocking betrayal and its aftermath asking just how far you ll go to have everything you want Jackie Stinson s best friend is dead and everyone knows who killed her Jackie wants to be many things but a martyr has never been one of them She is an ex emotional eater and mother of four who has finally lost the weight she long yearned to be free of In her new sharp edged body she goes by Jacqueline But leaving her old self behind proves harder than she ever imagined And while she believes she should be happier misery still chases her and motherhood threatens to subsume what little is left of her Jacqueline s only salve is her best friend Theresa whose seemingly perfect life she desperately covets Since they met in the maternity ward fifteen years earlier the two have survived the trials of motherhood side by side Theresa with her quiet cherubic daughter and Jacqueline with her rambunctious unruly boys Their bond is tight but it is not enough to keep Jacqueline finally moving through the world in the body she has always wanted from stealing a bit of Theresa s perfect life Hot Springs Drive is a dark heart pounding exploration of one woman s deepest desires and how the consequences of betrayal can ripple outward beyond the initial strike point In her third and fiercest novel acclaimed literary voice Lindsay Hunter deftly peels back the fragile veneer of two suburban families and the secrets roiling between them The Crosslinguistic Study of Language Acquisition Dan Isaac Slobin,2014-03-05 In this final volume in the series the contributors attempt to expand the contexts in which child language has been examined crosslinguistically The chapters build on themes that have been touched on anticipated and promised in earlier volumes in the series The study of child language has been situated in the disciplines of psychology and linguistics and has been most responsive to dominant issues in those fields such as nativism and learning comprehension and production errors input and universals of morphology and syntax The context has primarily been that of the individual child interacting with a parent and deciphering the linguistic code The code has been generally treated in these volumes as a system of morphology and syntax with little attention to phonology and prosody Attention has been paid occasionally to the facts that the child is acquiring language in a sociocultural setting and that language is used in contexts of semantic and pragmatic communication In addition there has been a degree of attention paid to the interactions between language and cognition in the process of development As for individual differences between children they have been discussed in those studies where they could not be avoided but such variation has rarely been the focus of systematic attention Differences between individual languages have been of great interest but these differences have

not often been placed in a framework of systematic typological variation And although languages and their grammars change over time the focus of attention on the individual child learner has generally led to neglect of explanatory principles that are best found on the level of linguistic diachrony rather than the level of innate ideas or patterns of learning and cognition in the individual child The chapter authors seek to explore these neglected contexts in more depth
