The Protection of Traditional Knowledge at the Frontiers of Drug Discovery Peter S Harrison, 2024-09-19 This book concerns the often fractious interface between drug discovery and commercialisation environmental degradation the biodiversity crisis the exploitation of indigenous peoples and the destruction of their culture the right to health inequalities of power and the ability of the law to protect knowledge For millennia medicinal plants have provided a trove of treatments for human ailments and the key to that treasure has been the traditional knowledge of the indigenous peoples who have lived alongside these plants More recently that knowledge has been taken often without consent or recompense by Western science as a springboard for the development of pharmaceutical agents As a response to threats to biodiversity and indigenous culture international mechanisms have created or are creating enforceable rights for indigenous peoples to control such knowledge With a background in pharmacology and molecular biology and significant experience as a lawyer in pharmaceutical and biotech patent litigation the author brings a fresh perspective to understanding the difficulties of enforcing such rights and in particular examines whether there is a philosophically justifiable limit to the downstream scope of such rights This book is aimed at all those with an interest in the control of indigenous genetic knowledge and the protection of indigenous culture whether academics anthropologists or pharmaceutical researchers and those seeking to make indigenous rights work as activists legislators or practising lawyers

The Political Problem of Religious Pluralism Thaddeus J. Kozinski, 2012-07-10 In contemporary political philosophy there is much debate over how to maintain a public order in pluralistic democracies in which citizens hold radically different religious views *The Political Problem of Religious Pluralism* deals with this theoretically and practically difficult issue by examining three of the most influential figures of religious pluralism theory John Rawls Jacques Maritain and Alasdair MacIntyre Drawing on a diverse number of sources Kozinski addresses the flaws in each philosopher's views and shows that the only philosophically defensible end of any overlapping consensus political order must be the eradication of the ideological pluralism that makes it necessary In other words a pluralistic society should have as its primary political aim to create the political conditions for the communal discovery and political establishment of that unifying tradition within which political justice can most effectively be obtained Kozinski's analysis though exhaustive and rigorous still remains accessible and engaging even for a reader unversed in the works of Rawls Maritain and MacIntyre Interdisciplinary and multi thematic in nature it will appeal to anyone interested in the intersection of religion politics and culture
