

Introduction

Please note:

Drawing or functional symbols are often used to describe braking schemes and device functions. The drawings and functional symbols used for this are in accordance with standard DIN 74 253, May 1979 edition, or standard DIN ISO 1219, August 1978 edition.

Drawing symbols

Drawing symbols (DIN 74 253) can be used for schematic representation of braking systems (installation plans) in motor vehicles.

Symbol connections are marked in conformity with standard DIN ISO 6786, December 1981 edition. These markings are not part of the symbols, but can be added to make the symbols easier to understand.

Functional symbols

Functional symbols (DIN ISO 1219) are used to represent the internal switching of devices or device parts. They consist of one or more basic signs and, in general, of one or more functional characters.

In circuit diagrams, the devices are represented in the off-position, and then if the latter is not available, in the original control position. In case of deviation from this, an instruction, for instance operating position, will be required.

Please note

The drawing and functional symbols presented in the next page are only an extract from the corresponding standard.
