Cultural Fault Lines in Healthcare Michael C. Brannigan, 2012-02-16 Healthcare in the U S faces two interpenetrating certainties First with over 66 racial and ethnic groupings our American Mosaic of worldviews and values unavoidably generates clashes in hospitals and clinics Second our public increasingly mistrusts our healthcare system and delivery One certainty fuels the other Conflicts in the clinical encounter particularly with patients from other cultures often challenge dominant assumptions of morally appropriate principles and behavior In turn lack of understanding misinterpretation stereotyping and outright discrimination result in poor health outcomes compounding further mistrust To address these cultural fault lines healthcare institutions have initiated efforts to ensure cultural competence Yet these efforts become institutional window dressing without tackling deeper issues issues having to do with attitudes understanding and most importantly ways we communicate with patients These deeper issues reflect a fundamental original fault line the ever widening gap between serving our own interests while disregarding the concerns of more vulnerable patients those on the margins those Others who remain disenfranchised because they are Other This book examines this and how we must become the voice for these Others whose vulnerability and suffering are palpable The author argues that as a vital and necessary condition for cultural competency we must learn to cultivate the virtue of Presence of genuinely being there with our patients Cultural competency is less a matter of acquiring knowledge of other cultures Cultural competency demands as a prerequisite for all patients not just for those who seem different genuine embodied Presence Genuine interpersonal embodied presence is especially crucial in our screen centric and Facebook world where interaction is mediated through technologies rather than through authentic face to face engagement This is sadly apparent in healthcare where we have replaced interpersonal care with technological intervention Indeed we are all potential patients When we become ill we too will most likely assume roles of vulnerability We too may feel as invisible as those on the margins These are not armchair reflections Brannigan s incisive analysis comes from his scholarship in healthcare and intercultural ethics along with his longstanding clinical experience in numerous healthcare settings with patients their families and healthcare professionals
