Contemporary Thinking on Transdisciplinary Knowledge Paul Gibbs, Alison Beavis, 2020-03-03 How can we understand what a transdisciplinary TD approach might actually comprise of given its complex and various uses This book asks the question of leading practitioners in the field of higher education and transdisciplinarity The emergence of transdisciplinarity has been a response to the often failed closed system discipline based approaches to solving complex social problems various reports and definitions may be found in projects reported by the OECD UNESCO and EU These

failures are often contingent upon disaggregated notions of epistemology and the compounding failures of ontological incongruities that are evident in these discipline based approaches. Such approaches are not necessarily confined to large seemingly insurmountable social problems but apply equally well to issues in educational institutions as workplaces. Transdisciplinary knowledge is in the liberation of new and imaginative understanding of the structured reality of open social systems. It gives rise to generative mechanisms which are central to relationships of agency and structure.

Transdisciplinary Higher Education Paul Gibbs, 2017-05-23. This book is not just about thinking or acting in transdisciplinary ways but about being transdisciplinary. To achieve this requires a deconstruction of our current way of acting within the definition of being that others impose upon us. Transdisciplinarity is a phenomenological perspective of reality and its manifestation in the world in which we exist. The volume develops a widely based transdisciplinary understanding of the issues faced by higher education institutions and those who work within and with these institutions to educate professionals. It incorporates international contributions from organisational theory, anthropologists, historians, psychologists, social sciences, philosophers and practitioners to create a volume that makes an important and distinct contribution to the literature on higher education and professional practice. Transdisciplinarity provides one of our greatest challenges in higher education both to the way it is organized and to the nature of the curriculum. This book is an important contribution to the debate about its implications. Higher education is being challenged by the nature of knowledge and how it is organized; the world is transdisciplinary but our institutions are constrained by the disciplines. This book contributes to the important debates about the challenges transdisciplinarity provides to our institutions. Professor David Boud, Emeritus Professor, Faculty of Arts and Social Sciences, University of Technology Sydney.

The SAGE Handbook of Learning and Work Margaret Malloch, Len Cairns, Karen Evans, Bridget N. O'Connor, 2021-10-13. The first two decades of the 21st century have contributed a growing body of research, theorisation and empirical studies on learning and work. This Handbook takes the consideration of this topic into a new realm, moving beyond the singular linking of identity, learning and work to embrace a more holistic appreciation of learners and their life-long learning. Across 40 chapters, learning and work are situated within educational, organisational, social, economic and political contexts. Taken together, these contributions paint a picture of evolving perspectives of how scholars from around the world view developments in both theory and practice and map the shifts in learning and work over the past two decades. Part 1: Theoretical perspectives of learning and work; Part 2: Intersections of learning and work in organisations and beyond; Part 3: Learning throughout working lives and beyond; Part 4: Issues and challenges to learning and work.
