TOPIC: PRINCIPAL PROFESSIONAL DEVELOPMENT

PROBLEM STATEMENT

Principal leadership is correlated with student achievement, and there are significant links between specific principal behaviors and student achievement (Petersen et al., 2010; Tang et al., 2018). Researchers posit that "effective leadership means more than knowing what to do—it's knowing when, how, and why to do it" (Petersen et al., 2010, p. 2). However, there is limited research on the principal as a learner, specifically principal professional development, and its impact on principal leader effectiveness (Garcia, 2014).

Researchers can identify the types of professional development experiences that are most likely to build principals' capacity to be successful leaders, negative retention trends and stagnant student achievement may be reversed.

PURPOSE OF THE STUDY

The purpose of this study is to explore the perceptions of principals regarding their preparedness to lead school improvement efforts. The research will seek to identify the types of professional development experiences that are most likely to build principals' capacity to be successful leaders, negative retention trends and stagnant student achievement may be reversed.

RESEARCH QUESTIONS

1. How do principals perceive their preparedness to lead school improvement efforts?
2. What types of professional development experiences are most likely to build principals' capacity to be successful leaders?
3. How do principals perceive their preparedness to lead school improvement efforts?

POPULATION AND METHODOLOGY

The targeted population for this study is principals who are currently serving in the position. The research will seek to identify the types of professional development experiences that are most likely to build principals' capacity to be successful leaders, negative retention trends and stagnant student achievement may be reversed.

BACKGROUND

The role of the principal is to ensure that the school is a place where all students can learn and grow. This role is often misunderstood, with many people believing that the principal is simply the person in charge of the building. In reality, the principal is a leader who is responsible for the success of the entire school. This role is often misunderstood, with many people believing that the principal is simply the person in charge of the building. In reality, the principal is a leader who is responsible for the success of the entire school.

IMPORTANCE OF SCHOOL LEADERSHIP

The role of the principal is to ensure that the school is a place where all students can learn and grow. This role is often misunderstood, with many people believing that the principal is simply the person in charge of the building. In reality, the principal is a leader who is responsible for the success of the entire school.

SIGNIFICANCE

The study of the principal's role is significant to the field of education. It is important to understand the role of the principal in order to ensure that the school is a place where all students can learn and grow. This role is often misunderstood, with many people believing that the principal is simply the person in charge of the building. In reality, the principal is a leader who is responsible for the success of the entire school.

LITERATURE REVIEW

There is a growing body of research on the role of the principal in school improvement. This research has focused on the role of the principal in leading the school, the role of the principal in managing the school, and the role of the principal in ensuring the success of the school. This research has found that the principal is a leader who is responsible for the success of the entire school.

Science, Learning, Identity , 2007-01-01 Over the recent years identity has become one of the most central theoretical concept and topics of scholarship in a number of disciplines including science education In this volume leading science educators articulate in carefully prepared case studies their theoretical perspective on science learning and identity

More importantly the authors of the chapters that in the different parts of the book engage each other in a collaboratively written chapter concerning some of the central issues that have arisen from their individual studies and in particular they engage each other over the similarities and differences between their approaches This book which features detailed case studies of identity as both resource and outcomes of learners in a variety of settings will be of interest to anyone concerned with learning science in and out of schools The book also caters for readers who have wondered about how identity mediates science learning and simultaneously how engagement in science related tasks and activities mediates the emergence and development of identities The general tenor of all chapters is a cultural historical and sociocultural framework that is brought to issues of identity thereby inherently transcending the individual person and linking identity to cultural possibilities
