Edge-Based Clausal Syntax Paul M. Postal,2010-12-17 An argument that there are three kinds of English grammatical objects each with different syntactic properties In Edge Based Clausal Syntax Paul Postal rejects the notion that an English

phrase of the form V DP invariably involves a grammatical relation properly characterized as a direct object He argues instead that at least three distinct relations occur in such a structure The different syntactic properties of these three kinds of objects are shown by how they behave in passives middles able forms tough movement wh movement Heavy NP Shift Ride Node Raising re prefixation and many other tests This proposal renders Postal s position sharply different from that of Chomsky who defined a direct object structurally as NP VP and with the traditional linguistics text s definition of the direct object as the DP sister of V According to Postal s framework sentence structures are complex graph structures built on nodes vertices and edges arcs The node that heads a particular edge represents a constituent that bears the grammatical relation named by the edge label to its tail node This approach allows two DPs that have very different grammatical properties to occupy what looks like identical structural positions The contrasting behaviors of direct objects which at first seem anomalous even grammatically chaotic emerge in Postal s account as nonanomalous as symptoms of hitherto ungrasped structural regularity

In Tall Cotton Charles Hulse, 2002 Set against the turbulent backdrop of the Depression Era American Southwest a coming of age story follows Totsy Woods as he discovers the wonders of sexual experimentation until one chance encounter hurls him into an adult world where he must learn a hard lesson about love trust and growing up Reprint
