green economy must be built on green jobs the kind of employment that is low carbon intended to reduce energy use and expected to restore environmental quality But attempts to define exactly what a green job is have led to varied and often contradictory answers There are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry This book deals with the relationship between green concepts green jobs green economy green growth and sustainable development It examines to which extent creation of green jobs supports

overall economic development as opposed to creation of elitist jobs and greenwashing In order to do so general conceptual frameworks for green jobs green economy green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty The selection includes advanced the European Union the United States of America Australia Canada Republic of Korea Japan and developing countries Mexico China Turkey and Brazil The analysis presented in this book shows that although green concept is well intentioned its implementation depends on local circumstances economic political and social Developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs Thus greening the economy does not diminish differences between rich and poor This book is suitable for those who study and work in Ecological Economics Sustainable Development and Labor Economics      **Application of Big Data and Business**

stockpile each year Munitions include projectiles bombs rockets landmines and missiles Open burning open detonation OB OD of these munitions has been a common disposal practice for decades although it has decreased significantly since 2011 OB OD is relatively quick procedurally straightforward and inexpensive However the downside of OB and OD is that they release contaminants from the operation directly into the environment Over time a number of technology alternatives to OB OD have become available and more are in research and development Alternative technologies generally involve some type of contained destruction of the energetic materials including contained burning or contained detonation as well as contained methods that forego combustion or detonation Alternatives for the Demilitarization of Conventional Munitions reviews the current conventional munitions demilitarization stockpile and analyzes existing and emerging disposal treatment and reuse technologies This report identifies and evaluates any barriers to full scale deployment of alternatives to OB OD or non closed loop incineration combustion and provides recommendations to overcome such barriers **Multi-Criteria**
