*Predication Theory* Donna Jo Napoli, 1989-05-11 In this study Donna Jo Napoli takes a common sense approach to the notions of argument and predicate. Discussions of predication within Government and Binding theory have stressed the configurational properties of the phrases involved and Napoli argues that this has led to proposals for more and more elaborate syntactic structures that nevertheless fail to provide genuinely explanatory accounts. She presents a convincing case for viewing the notion of predicate as a semantic primitive which cannot be defined by looking simply at the lexicon or simply at the syntactic structure and offers a theory of predication where the key to the subject predicate relationship is theta role assignment. The book then goes on to offer principles for the coindexing of a predicate with its subject role player. These coindexing principles make use of Chomsky's 1986 notion of barriers but instead of being sensitive to configurational notions like c-command and governing category, Napoli argues that they are sensitive to thematic structure. In the final chapter of the book, Napoli extends the principles for predication coindexing to anaphor binding by introducing the notion of argument ladders.

**Differentiation That Really Works** Cheryll M. Adams, Rebecca L. Pierce, 2021-09-03 Differentiating requires more than just a simple bag of tricks. Teachers need to have concrete strategies if they want to provide choice and challenge for all learners in their classroom. The strategies included in this book were chosen based on their ease of implementation and modification. In addition, they all encourage student engagement, provide inherent opportunities for differentiation, and are appropriate for multiple grade levels. *Differentiation That Really Works* provides time-saving strategies and lesson ideas created and field-tested by practicing professionals in their own heterogeneous classrooms. These lessons can be used as written or can be modified to meet the needs of a particular classroom. The book also provides templates that can be used to develop new lessons using each strategy. These strategies, including exit cards, choice boards, cubing, graphic organizers, learning contracts, and tiered lessons, help pave the way to a differentiated classroom that meets all students' needs.
