

Chapter Prerequisite Skills

PREREQUISITE SKILLS QUIZ

Preparing for Success To prepare for success in this chapter, test your knowledge of these concepts and skills. You may want to look at the pages referred to in case for additional review.

1. **Variables** Label the given, the least, and the greatest in the expression x^2 .

Write the mixed number as an improper fraction. $\frac{7}{8} \frac{5}{8}$

$$\frac{1}{2} \cdot \frac{1}{3} \quad \frac{1}{4} \cdot \frac{1}{5} \quad \frac{1}{6} \cdot \frac{1}{7}$$

Find the product. $\frac{1}{2} \cdot \frac{3}{4}$

$$\frac{1}{2} \cdot \frac{3}{4} \quad \frac{1}{3} \cdot \frac{2}{5} \quad \frac{1}{4} \cdot \frac{3}{7}$$

Write the given in words and as a repeated multiplication. Then evaluate the power. 10^2

$$10^2 \quad 10^3 \quad 10^4 \quad 10^5 \quad 10^6$$

NOTETAKING STRATEGIES

RECORDING THE PROCESS When solving equations in class, be sure to write a verbal description next to each step in a calculation. Then you can refer to the examples when solving similar problems.

Calculation step	Verbal description
$-5x - 2 = -12$	Write original equation.
$-5x - 2 + 2 = -12 + 2$	Add 2 to each side.
$-5x = -10$	Simplify.
$\frac{-5x}{-5} = \frac{-10}{-5}$	Divide each side by -5 .
$x = 2$	Simplify.

The strategy above will be helpful in Lesson 4.5 when you are simplifying variable expressions with powers.

4.1 Finding Prime Numbers

Goal

Identify prime and composite numbers using divisibility.

Materials

• pencil
• paper

A **prime number** is a whole number that is greater than 1 and has exactly two whole number factors, 1 and itself. A **composite number** is a whole number that is greater than 1 and has more than two whole number factors. A **multiple** of a number is the product of the number and any nonzero whole number.

Investigate

Use patterns to determine if a number is prime or composite.

- Write the whole numbers from 2 to 60 in rows of 6 as shown.
- Start with the number 2. Circle it and cross out every multiple of 2 after 2. (The first few multiples of 2 have been crossed out for you.)
- Move to the next number that is not crossed out. Circle it and cross out all other multiples of that number.
- Repeat step 3 until every number is either circled or crossed out.

2	3	4	5	6
2	3	4	5	6
7	8	9	10	11
12	13	14	15	16
17	18	19	20	21
22	23	24	25	26
27	28	29	30	31
32	33	34	35	36
37	38	39	40	41
42	43	44	45	46
47	48	49	50	51
52	53	54	55	56
57	58	59	60	61

Draw Conclusions

- Reflecting** What can you say about the numbers that have been crossed out? What can you say about the numbers that have been circled? Use the words *prime* and *composite* in your answers.
- Critical Thinking** All the numbers in the sixth column are crossed out because they are all multiples of 5. Explain why all the numbers in the second column (except for 2), in the third column (except for 3), and in the fourth column are crossed out.
- Predict** Suppose you repeated the activity but arranged the numbers in rows of 10 instead of 6. Predict which columns would contain only crossed-out numbers. Then check your prediction.

A Quiet Revolution Michael D. Steele,Craig Huhn,2018-03-01 Over the past thirty years Holt High School in central Michigan has engaged in a quiet revolution that has transformed mathematics teaching and learning in the district From its roots as a rural high school housed in a single building in the 1980s the high school mathematics staff has grown an innovative meaningful high school mathematics curriculum that sees nearly every student in the district completing the equivalent of Precalculus Tracking was dropped in favor of an evolving suite of supports designed to promote student success in unifying rather than segregating ways Mathematics classrooms in Holt are discourse rich environments where teachers and students explore meaningful uses for mathematics as they reason and problem solve together This transformation took place and persists amidst changing professional partnerships shifting district demographics increasing accountability measures at the state and national level and turnover in teaching staff and district leadership In this book we explore the case of Holt High School though an exploration of how the mathematics curriculum has shifted over the past thirty years and the conditions and supports that have been put in place in the district to make this work fruitful and sustainable The story includes successes failures celebrations and challenges as we chronicle Holt s high school mathematics evolution Guiding questions protocols and reflective activities are provided for teachers and district leaders to begin the challenging

 anxiety Often weak basic elementary skills show up as learning issues by the time they enter middle school many also suffer
 from habitual mistakes Anxiety can stop kids from developing knowledge of the basics that they will need to understand
 algebra An overwhelmed mind isn t open enough to learn new skills Solving the Problem Preparing for Algebra is designed as
 a supplementary workbook We start by looking at simple things differently The first chapter may appear too simple but it is
 written to bridge the language barrier between rote elementary computations to the more abstract algebra they will

encounter in middle school The pages of this book present one clear content area at a time and fewer problems than standard textbooks Our aim is to reduce student anxiety by minimizing the number of problems per page using larger fonts giving more room for computation and using clear examples The Favorite Mistakes section in the back addresses and corrects the most common habitual mistakes The Result This book should take your child from I hate math to It s ok I got it Using Preparing for Algebra will rebuild the basics so that algebra and its new language will become easy to understand for your child You ll find that about 80% of your student s math challenges are covered in this book As a parent you may have struggled to help your child with his or her math homework you ll be pleasantly surprised at how easy it is to help your child using this book Who Wrote this Book As an after school program The Homework Club employed 100 s of educators and taught 1000 s of students These worksheets were developed over 18 years for students to go from their basic elementary math education to succeed in middle school math and specifically with algebra Preparing for Algebra is a must to help your child succeed with middle school algebra
