*Actions of Their Own to Learn*, 2017-01-01 What does it mean to take actions of one's own to learn How do human beings create meaning for themselves and with others How can learners active efforts to build knowledge be encouraged and supported In this edited compilation scholars

from a diverse range of academic and professional backgrounds address these questions grounded in the conviction that the ability to take effective action of one's own to learn is itself an essential form of knowledge. In an era of dramatic social, environmental and political change, the need to access vast amounts of information to make decisions demands that learners become active agents in their own knowledge development. Educators are transforming ideas about their roles as they strive to provide guidance to help learners take the lead in their own learning. Learners are building new ideas about their capacities to gather and organize information while working with others. No longer simply consumers of information, they are beginning to see themselves as capable and effective researchers. Researchers are also expanding ideas about their knowledge gathering work and identities. No longer simply reporters of information, researchers are seeing themselves as learners as they engage in deeper, more collaborative ways with participants in their research. Chapter authors describe their dedicated and often career-long journeys to show the vital connections between knowledge, acting to learn, identity and being. To engage in this work means disrupting traditional ideas about how knowledge is most effectively acquired. This book will inspire researchers, educators and educational planners as they build the kinds of new participative structures needed to support individual and collective actions to learn. **Human Centered Management** Maria-Teresa Lepeley, 2020-04-13. We have never had more freedom to acquire information to make decisions and organizations have never been so pressed to demonstrate accountability as they communicate with better informed customers and users. People who work IN an organization must also work FOR the organization to accomplish its mission. In this environment, humans are no longer just a resource; they are the reason an organization exists. New constructs are needed to ensure this human-centered paradigm shift. This book sets out the rationale for this shift and stimulates the discussion and the discovery of effective approaches and solutions to innovate for social and environmental good. Written by an expert in quality standards, the book offers a coherent model which synchronizes the organizational structure with the talent required to develop resilient and agile work environments. New strategies to develop talent will be critical, and multidisciplinary approaches from scholars and practitioners from around the world will be required to effectively collaborate and articulate the solutions. The proposition in the book focuses on continuous improvement and interdisciplinary collaboration between scholars and practitioners across different industries.

sectors and national borders in order to address the unavoidable disruptions in the global VUCA environment

**Information Design Unbound** Sheila Pontis, Michael Babwahsingh, 2023-10-05 As everyday tasks grow more confusing and as social and global problems grow more complex the information designer's role in bringing clarity has reached a new level of importance. In order to have a positive impact they must go beyond conventional approaches to uncover real needs, make insightful connections and develop effective solutions. *Information Design Unbound* provides a clear, engaging introduction to the field and prepares students to be strategic thinkers and visual problem solvers who can confidently make sense in a changing world. Sheila Pontis and Michael Babwahsingh present a holistic view of information design, synthesizing decades of research, cross-disciplinary knowledge and emerging practices. The book opens by laying a foundation in the field, first painting the bigger picture of what it is and how it originated, before explaining the scientific and cultural dimensions of how people perceive and understand visual information. A discussion of professional practices, ethical considerations and the expanding scale of challenges sheds light on the day-to-day work of information designers today. Detailed chapters then delve into the four areas that are integral to all types of information design work: visual thinking, research, sensemaking and design. The final section of the book puts everything together with detailed project walk-throughs in areas such as icon design, instructions, wayfinding, organizational strategy and healthcare system change. Written and designed with students' needs in mind, this book brings information design fundamentals to life; exercises allow students to put lessons directly into practice; case studies demonstrate how information designers think and work; and generous illustrations clarify concepts in a visually engaging way. *Information Design Unbound* helps beginning designers build the mindset and skillset to navigate visual communication challenges wherever they may arise.
