

## Digestive System Study Guide

Name: Elyjah Johnson

1. Describe the anatomy and physiology of the gastrointestinal (GI) organs and accessory organs. (Complete the Anatomy column.)

| Organ                                                                                                 | Anatomy                                           | Physiology                                                                                                                                                            |
|-------------------------------------------------------------------------------------------------------|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Mouth</b><br>     | <b>Teeth</b>                                      | Mechanical digestion of food via chewing                                                                                                                              |
|                                                                                                       | <b>Teeth: Enamel</b>                              | Hard outer protective layer                                                                                                                                           |
|                                                                                                       | <b>Teeth: Dentin</b>                              | Bone-like material that surrounds the pulp                                                                                                                            |
|                                                                                                       | <b>Teeth: Pulp</b>                                | Houses the nerves and blood vessels                                                                                                                                   |
|                                                                                                       | <b>Teeth: Periodontal membranes</b>               | Anchor the teeth to the jawbone                                                                                                                                       |
|                                                                                                       | <b>Tongue</b>                                     | Taste food; aids in the mechanical digestion of food; pushes bolus to pharynx                                                                                         |
|                                                                                                       | <b>Tongue: Lingual tons</b>                       | Protect us from infections                                                                                                                                            |
| <b>Pharynx</b><br>   | <b>Salivary Glands</b>                            | Produce saliva and amylase                                                                                                                                            |
|                                                                                                       | <b>Soft palate</b>                                | Closes off nasopharynx when swallowing                                                                                                                                |
| <b>Esophagus</b><br> | <b>Epiglottis</b>                                 | Covers glottis during swallowing to prevent choking                                                                                                                   |
|                                                                                                       | <b>Lumen</b>                                      | Space for the food bolus to travel through                                                                                                                            |
|                                                                                                       | <b>Mucosa</b>                                     | Nonkeratinized stratified squamous epithelium provides a protective lining                                                                                            |
|                                                                                                       | <b>Submucosa</b>                                  | Contains blood vessels, lymphatic vessels, nerves, and glands; the glands secrete mucus into the lumen to aid in the transport of food                                |
| <b>Stomach</b><br> | <b>Muscularis (two layers of smooth muscle)</b>   | Moves the food via peristalsis                                                                                                                                        |
|                                                                                                       | <b>Lower esophageal sphincter</b>                 | Relaxes to allow the bolus into the stomach and then contracts to close, prevents acid from entering the esophagus                                                    |
|                                                                                                       | <b>Mucosa (gastric pits)</b>                      | Produces gastric juice composed of pepsinogen and hydrochloric acid (pH 2; kills bacteria and converts pepsinogen to pepsin); the semiliquid food is now called chyme |
|                                                                                                       | <b>Muscularis (three layers of smooth muscle)</b> | Mechanical digestion of food via peristalsis                                                                                                                          |
|                                                                                                       | <b>Pyloric Sphincter</b>                          | Controls the movement of chyme into the small intestine                                                                                                               |
