The Chicago Guide to Writing about Multivariate Analysis Jane E. Miller, 2008-04-15 Writing about multivariate analysis is a surprisingly common task Researchers use these advanced statistical techniques to examine relationships among multiple variables such as exercise diet and heart disease or to forecast information such as future interest rates or unemployment Many different people from social scientists to government agencies to business professionals depend on the results of multivariate models to inform

their decisions At the same time many researchers have trouble communicating the purpose and findings of these models Too often explanations become bogged down in statistical jargon and technical details and audiences are left struggling to make sense of both the numbers and their interpretation Here Jane Miller offers much needed help to academic researchers as well as to analysts who write for general audiences The Chicago Guide to Writing about Multivariate Analysis brings together advanced statistical methods with good expository writing Starting with twelve core principles for writing about numbers Miller goes on to discuss how to use tables charts examples and analogies to write a clear compelling argument using multivariate results as evidence Writers will repeatedly look to this book for guidance on how to express their ideas in scientific papers grant proposals speeches issue briefs chartbooks posters and other documents Communicating with multivariate models need never appear so complicated again
