### **Study Guide for Quiz 4: Ecosystem Services and Biodiversity**

*Warning: Long answers! Your answers don't need to be as long as mine, but do read these, not only to check yours, but also to deepen your understanding!! The quiz will be mostly multiple choice, but there will be at least one open-ended where I will expect you to apply your knowledge.*

#### **Ecosystem Services**

**Define of Ecosystem:** An ecosystem is a community of living organisms interacting with one another and with their physical environment. Ecosystems include the nonliving (abiotic) factors as well, that is the physical and chemical components, such as soils, water, and nutrients that support the organisms living within them, as well as all the interactions among all the living and nonliving components.

**Define of Ecosystem Services:** *Ecosystem Services* are the processes by which the environment produces resources that we want and need. Some are necessary for our survival. Some make our lives better.

**Give six examples of Ecosystem Services:**

Any 6 of these:

- moderate weather extremes and their impacts
- disperse seeds
- mitigate (lessen the frequency and severity of) drought and floods
- protect people from the sun's harmful ultraviolet rays
- cycle and move nutrients
- protect stream and river channels and coastal shores from erosion
- detoxify and decompose wastes
- control agricultural pests
- maintain biodiversity
- generate and preserve soils and renew their fertility
- contribute to climate stability
- purify the air and water
- regulate disease carrying organisms
- pollinate crops and natural vegetation

**Why are Ecosystem Services important?** Natural ecosystems perform fundamental life-support functions upon which human civilization depends. Unless human activities are carefully planned and managed, valuable ecosystems will continue to be impaired or destroyed.

**What do we mean when we say we are looking at costs and benefits?** Whenever you are making decisions involving the environment, you have to look at the costs, not only the actual dollar amount, but also any negative effects that could result. You also need to look at the possible benefits, or the good things that would result. You need to weigh the costs and benefits carefully when making a decision. You also need to make sure you look at long-term costs as well as short-term costs. Some costs and benefits are more serious than others. It isn't easy to do, but it is important.
