so with great skill and creativity Round Up the Usual Suspects provides a comparison of the crime fighting models and justice proceedings of each of these TV series Each series has its own special crime fighting niche and each approaches its job with a different set of values and different paradigms of discovery and proof Their separate approaches are each firmly grounded in different components of human nature analytical reasoning for instance in CSI memory in Cold Case and teamwork in Law Order After examining each of the individual series in depth Ruble goes on to investigate some of the historical antecedents in classical TV detective series such as The FBI and Dragnet It is interesting to note that these crime fighting methodologies are extensions of the way we all process information about the world Ray Ruble here aims to increase our appreciation for the ingenious manner in which fictional cases are broken and convictions convincingly secured and also illuminates the deeper human elements that lie under a more implicit spotlight in these runaway hits New Scientist ,2005
