**Perspectives on Causation** Richard Goldberg, 2011-10-21 The chapters in this volume arise from a conference held at the University of Aberdeen concerning the law of causation in the UK Commonwealth countries France and the USA The distinguished group of international experts who have contributed to this book examine the ways in which legal doctrine in causation is developing and how British law should seek to influence and be influenced by developments in other countries As such the book will serve as a focal point for the study of this important area of law The book is organised around three themes the black letter law scientific evidence and legal theory In black letter law scholarship major arguments have emerged about how legal doctrine will develop in cases involving indeterminate defendants and evidential gaps in causation Various chapters examine the ways in which legal doctrine should develop over the next few years in particular in England Scotland Canada and the USA including the problem of causation in asbestos cases In the area of scientific evidence its role in the assessment of causation in civil litigation has never been greater The extent to which such evidence can be admitted and used in causation disputes is controversial This section of the book is therefore devoted to exploring the role of statistical evidence in resolving causation problems including recent trends in litigation in the UK USA Australia and in France and the question of liability for future harm In the legal theory area the so called NESS necessary element in a sufficient set test of causation is discussed and defended The importance of tort law responding to developing science and observations from the perspective of precaution and indeterminate causation are also explored The book will be of interest to legal academics policy makers in the field specialist legal practitioners those in the pharmaceutical and bioscience sectors physicians and scientists

**A Theory of Tort Liability** Allan Beever, 2016-08-25 This book provides a comprehensive theory of the rights upon which tort law is based and the liability that flows from violating those rights Inspired by the account of private law contained in Immanuel Kant's

Metaphysics of Morals the book shows that Kant's theory elucidates a conception of interpersonal wrongdoing that illuminates the operation of tort law. The book then utilises this conception applying it to the various areas of tort law in order to develop an understanding of the particular areas in question and just as importantly their relationship to each other. It argues that there are three general kinds of liability found in the law of tort: liability for putting another or another's property to one's purposes; direct liability for doing something to a third party that puts another or another's property to one's purposes; and liability for pursuing purposes in a way that improperly interferes with the ability of another to pursue her legitimate purposes. It terms these forms liability for direct control, liability for indirect control, and liability for injury respectively. The result is a coherent philosophical understanding of the structure of tort liability as an entire system. In developing its position, the book considers the laws of Australia, Canada, England and Wales, New Zealand, and the United States.
