computer games and sales of such games increased 22.9 percent last year. The average amount of game playing time was found to be 13.2 hours per week. The popularity and market success of games is evident from both the increased earnings from games over 7 Billion in 2005 and from the fact that over 200 academic institutions worldwide now offer game related programs of study. In view of the intense interest in computer games, educators and trainers in business industry, the government and the military would like to use computer games to improve the delivery of instruction. *Computer Games and Instruction* is intended for these educators and trainers. It reviews the research evidence supporting use of computer games for instruction and also reviews the history of games in general in education and by the military. In addition, chapters examine gender differences in game use and the implications of games for use by lower socio-economic students, for students reading and for contemporary theories of instruction. Finally, well known scholars of games will respond to the evidence reviewed.

It presents a contrasting array of contemporary views of the city by artists, architects and writers who through image and text offer their own dreams of urbanity in an attempt to define the magnetic attraction that is the city. *The Software Encyclopedia 2000* Bowker Editorial Staff, 2000-05. *PC Mag*, 1995-06-27.
