different disciplines including legal studies sociology psychology computer science and public policy Student Financing of Higher Education Donald Heller, Claire Callender, 2013-06-07 The financing of higher education is undergoing great change in many countries around the world In recent years many countries are moving from a system where the costs of funding higher education are shouldered primarily by taxpayers through government subsidies to one where students pay a larger share of the costs There are a number of factors driving these trends including A push for massification of higher education in the recognition that additional revenue streams are required above and beyond those funds available from governments in order to achieve higher participation rates Macroeconomic factors which lead to constraints on overall government revenues Political factors which manifest in demands for funding of over services thus restricting the funding available for higher tertiary education A concern that the returns to higher education accrue primarily to the individual rather than to society and thus students should bear more of the burden of paying for it This volume will help to contribute to an understanding of how these trends occur in various countries and regions around the world and the impact they have on higher education institutions students and society as a whole With contributions for the UK USA South Africa and China this vital new book gives a truly global picture of the rapidly changing situation **OECD Development Policy Tools Evidence-based Policy Making for Youth Well-being A Toolkit** OECD, 2017-10-17 With 1 2 billion people today s youth population aged 15 24 represents the largest cohort ever to enter the transition to adulthood Close to 90% of these young people live in developing countries and the numbers will practically double in the least developed countries **Accessing Post-School Studies**

Venicia McGhie & Madge du Preez, 2017-12-01 Accessing Post School Studies A student s GPS to successful learning makes a valuable contribution to often problematic and pertinent South African higher education issues such as student access and success student learning student support and student engagement In this regard the authors draw on the works of higher education theorists such as Kuh Tinto Marton and S lj The book is primarily a helpful resource for South African learners in school students at universities life orientation teachers as well as parents of prospective university students It will especially assist students to adapt to the university environment Prof Victor N Teise Sol Plaatje University Kimberley South Africa

Creating the New African University , 2023-05-25 Creating the New African University grapples with the existence of African universities particularly in post independent Africa where Higher Education Institutions HEIs are supposed to live up to the expectations of being adaptive in dealing with prevalent complex dynamic contemporary and future challenges facing African societies The book tackles the issue of what ought to be done for African universities to maintain a structure and identity that ensures their relevance in Africa s development through generating and transforming knowledge into actions for the common good It engages issues within the context of how post colonial transformative obligations have been managed in light of the prevalent epistemological and pedagogical underpinnings that form the foundations of these universities as they seek to break from the clutches of colonial legacies This book further highlights an urgent need to do away with silos and

embrace a multidisciplinary interdisciplinary transdisciplinary and cross disciplinary dialogical approach towards knowledge generation Such an approach is essential in efforts aimed at enhancing the sustainable reconfiguration of university structures and functions whilst linking knowledge produced to diverse social economic and political facets of African societies in ways that promote and sustain competitiveness in a rapidly globalising world beset with technological advancements

Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge Discrimination in an Unequal World explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories
