Nils Peterson, Tarla Peterson, Jianguo Liu, 2013-10-29 How our thirst for more and larger houses is undermining society and what we can do about it Have we built our way to ruin Is your desire for that beach house or cabin in the woods part of the environmental crisis Do you really need a bigger home Why don't multiple generations still live under one roof In *The Housing Bomb* leading environmental researchers M Nils Peterson Tarla Rai Peterson and Jianguo Liu

sound the alarm explaining how and why our growing addiction to houses has taken the humble American dream and twisted it into an environmental and societal nightmare Without realizing how much a contemporary home already contributes to environmental destruction most of us want bigger and bigger houses and dream of the day when we own not just one dwelling but at least the two our neighbor does We push our children to get out on their own long before they need to creating a second household where previously one existed We pave and build demolishing habitat needed by threatened and endangered species adding to the mounting burden of global climate change and sucking away resources much better applied to pressing societal needs Reduce reuse recycle is seldom evoked in the housing world where economists predict financial disasters when new housing starts decline and the idea of renovating inner city residences is regarded as merely a good cause Presenting irrefutable evidence this book cries out for America and the world to intervene by making simple changes in our household energy and water usage and by supporting municipal state national and international policies to counter this devastation and overuse of resources It offers a way out of the mess we are creating and envisions a future where we all live comfortable nondestructive lives The housing bomb is ticking and our choice is clear change our approach or feel the blast
