*Modern Development and Challenges in Virtual Reality* Mamata Rath, Tusharkanta Samal, 2023-10-18 Virtual reality VR is one of the technologies with the highest expectations for future growth. By creating realistic images and objects a VR environment gives the user the impression that they are completely engrossed in their surroundings. VR applications that go beyond leisure, tourism and marketing are now in high demand and thus the technology must be user friendly and economical. The major technology firms are already striving to create headsets that do not require cables and that allow for high definition viewing. Artificial intelligence is being used to control VR headsets that have far more powerful CPUs. The new standard will also offer some intriguing capabilities like the ability to connect huge user communities and additional gadgets. Customers will be able to get photos in real time in corporate settings almost as if they were seeing them with their own eyes. This book presents a comprehensive overview of VR applications in medicine, electric vehicles, aviation, architecture and more.

**Advances on Mechanics, Design Engineering and Manufacturing IV** Salvatore Gerbino, Antonio Lanzotti, Massimo Martorelli, Ramón Mirálbes Buil, Caterina Rizzi, Lionel Roucoules, 2022-09-24 This book gathers contributions presented at the International Joint Conference on Mechanics Design Engineering and Advanced Manufacturing JCM 2022 held on June 1-3, 2022 in Ischia, Italy. It reports on cutting edge topics in product design and manufacturing such as industrial methods for integrated product and process design, innovative design and computer aided design. Further topics covered include virtual simulation and reverse engineering, additive manufacturing, product manufacturing, engineering methods in medicine and education, representation techniques and collaborative and soft robotics. The book is organized into five main parts reflecting the focus and primary themes of the conference. The contributions presented here not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work, they are also intended to stimulate new research directions, advanced applications of the methods discussed and future interdisciplinary collaborations.

*Computational Intelligence based Optimization of Manufacturing Process for Sustainable Materials* Deepak Sinwar, Kamalakanta Muduli, Vijaypal Singh Dhaka, Vijander Singh, 2023-09-25 The text comprehensively discusses computational models including artificial neural networks, agent based models and decision field theory for reliability engineering. It will serve as an ideal reference text for graduate students and academic researchers in the fields of industrial engineering, manufacturing engineering, computer engineering and materials science. Discusses the development of sustainable materials using metaheuristic approaches. Covers computational models such as agent based models, ontology and decision field theory for reliability engineering. Presents swarm intelligence methods such as ant colony optimization, particle swarm optimization and grey wolf optimization for solving the manufacturing process. Includes case studies for industrial optimizations. Explores the use of computational optimization for reliability and maintainability theory. The text

covers swarm intelligence techniques including ant colony optimization particle swarm optimization cuckoo search and genetic algorithms for solving complex industrial problems of the manufacturing industry as well as predicting reliability maintainability and availability of several industrial components      *Catalog of Copyright Entries.
