Smart Power Christian Whiton, 2013-09-30 From China's cyber war on America to Islamist victories across the Middle East to the lengthening shadow cast by Iran the Washington establishment has failed to neutralize foreign threats that are becoming more dangerous No one on the political left or right has articulated a realistic defense strategy to meet these new challenges of the twenty first century Smart Power written by a prolific writer and TV commentator who saw firsthand the successes and failures of statecraft in the George W Bush administration offers new solutions to the threats America faces today including radical reform in Washington Smart Power is one of the first books to draw heavily on leaked classified government cables revealing what went wrong in episodes like the Arab Spring and the thwarted 2009 uprising in Iran Christian Whiton uses personal accounts from his experience in the George W Bush administration to show how China compromises U S security with the help of American politicians bureaucrats and scholars He explains why Washington mistreats traditional allies like Israel Japan and Taiwan He presents nonviolent options to undermine the governments of Iran and China and to help moderate Muslims challenge Islamists He also outlines radical reform of America's national security apparatus Whiton is consistently stingy with the lives of America's servicemen and wary of new foreign commitments but he is unapologetic in advancing core U S national interests Using a rich mix of history captivating personal accounts and recent events Whiton defines what would really constitute smart power by reimagining the neglected tools of statecraft that lie between diplomacy and outright war      **The U.S. Army War College Guide to National Security Issues**, 2010

Discerning President Obama's National Security Strategy Kristen E. Boon, Douglas C. Lovelace, Aziz Z. Huq, 2010 Volume 111 of Terrorism Commentary on Security Documents Discerning President Obama's National Security Strategy makes available documents from the first fifteen months of the Obama administration that provide insights into its developing national security strategy Included are documents that include detailed intelligence estimates and strategies as well as documents that outline important lessons regarding stability and reconstruction in Iraq Additional documents provide valuable insight into the Obama Administration's Afghanistan and Pakistan Strategy General Editor Douglas Lovelace an expert in U S military matters elucidates the complexities of military spending and of counter insurgency tactics      U.S. Army War College Key Strategic Issues List, 2009      U.S. Army War College Key Strategic Issues List Army War College (U.S.). Strategic Studies Institute, 2009 The purpose of the Key Strategic Issues List KSIL is to provide military and civilian researchers a ready reference for issues of special interest to the Department of the Army and the Department of Defense DoD Unlike other lists that generally reflect issues which are operational or tactical in nature the focus of the KSIL is strategic It highlights topics that senior Army and DoD leaders should consider in providing military advice and formulating

military strategy At present the U S military is engaged in a changing situation in Iraq and an increasing presence in Afghanistan as well as efforts to restore balance in force sizing and structure With the publication of the 2009 KSIL the Strategic Studies Institute and the U S Army War College invite all researchers to contribute to informing America s leaders of current and emerging challenges

Implementing Smart Power United States. Congress. Senate. Committee on Foreign Relations,2009

**Orchestrating the Instruments of Power** D. Robert Worley,2015-07-15 National security a topic routinely discussed behind closed doors by Washington s political scientists and policy makers is believed to be an insider s game All too often this highly specialized knowledge is assumed to place issues beyond the grasp and interest of the American public Author D Robert Worley disagrees The U S national security system designed after World War II and institutionalized through a decades long power conflict with the Soviet Union is inadequate for the needs of the twenty first century and while a general consensus has emerged that the system must be transformed a clear and direct route for a new national security strategy proves elusive Furnishing the tools to assist in future national security reforms Orchestrating the Instruments of Power articulates and synthesizes the concepts of America s economic political and military instruments of power

*Military Soft Power* Carol Atkinson,2014-06-26 The military has long been associated with hard power yet it is engaged in public diplomacy as it represents the U S abroad and facilitates the diffusion of ideas Military Soft Power examines one such aspect of U S public diplomacy how the United States extends its influence or soft power

worldwide through military educational exchange programs hosted by the United States elite military schools its war and staff colleges The presence of international officers at U S military schools is substantial yet very little is known about the long term impacts of these exchanges This study shows how the exchanges build personal and professional networks that then serve as important conduits of ideas between the United States and other countries These networks help to improve interoperability between the U S military and its partner nations and to extend U S influence through military soft power rather than through hard power This is an alternative bottom up view of how military organizations can influence political processes and decisions through the development of cross border communities of military professionals This involves a two step model of socialization First individuals military officers are socialized by a large political institution the U S through its war and staff colleges Second these individuals function as idea entrepreneurs bringing new ideas beliefs and practices home with them There is a need for policies and programs that help countries successfully transition from authoritarian governance to democratic rule as well as countries undergoing democratic revolutions and those seeking more gradual change Exchange programs are one pathway in which an important group of citizens military officers and their families can experience the everyday functioning of democratic practices and institutions This unique survey provides timely insights into the important political impacts of military exchange programs and how military institutions and their personnel influence international politics beyond simply being used as an instrument of coercion

The Challenge of Global Commons and Flows for US Power Mika Aaltola, Juha K  pyl  , 2016-04-01 Global commons are domains that fall outside the direct jurisdiction of sovereign states the high seas air space and most recently man made cyberspace and thus should be usable by anyone These domains even if outside the direct responsibility and governance of sovereign entities are of crucial interest for the contemporary world order This book elaborates a practice based approach to the global commons and flows to examine critically the evolving geopolitical strategy and vision of United States The study starts with the observation that the nature of US power is evolving increasingly towards the recognition that command over the flows of global interdependence is a central dimension of national power The study then highlights the emerging security and governance of these flows In this context the flows and the underlying global critical infrastructure are emerging as objects of high level strategic importance The book pays special attention to one of the least recognized but perhaps most fundamental challenges related to the global commons namely the conceptual and practical challenge of inter domain relationships between maritime air space and cyber flows that bring about not only opportunities but also new vulnerabilities These complexities cannot be understood through technological means alone but rather the issues need to be clarified by bringing in the human domain of security

*Insight Turkey 2015 - Winter 2015 (Vol. 17, No. 1)* , Religion religious groups and teo politics are always most vital topics of the Western politics The relationship between politics and religion is reciprocal While both domestic and international political actors try to exploit religion and religious sensitivity for their political interests and gains religion and belief systems want to

use significant power over main political and cultural actors and perceptions With the emergence of the violent non state actors such as Taliban al Qaeda and DAISH which were all surfaced in the Middle East but have become transnational actors deeply affecting European politics and the recent popularity of far right Islam phobic movements such as PEGIDA in Europe have once again forced us to look closely at the relationship between religion and politics in Western politics specifically in Europe Even though it is generally perceived that the religion has lost its war against politics in Europe as European countries have established secular democracies based on the promotion of individual freedoms and pluralism it is an undisputable fact that the general framework in European states is largely affected by the Christian values and often its imprints are seen in politics The developments around the recent large scale immigration toward Europe from Middle East and Africa are the reasons which force us to make this bold statement How Europe deals with mostly Muslim immigrants who come from very different ethnic and cultural backgrounds from European values is very alarming After unsuccessful assimilation and or integration efforts for these non European and non Christian immigrants state and societal actors have instigated to take restrictive measures against further immigration and migrants Furthermore we have started to witness strong wave of xenophobia and Islamophobia in these democratic European societies Islamophobia relations with European Muslims and implications of political developments in the Muslim World will significantly influence the future religion state relations in European countries However for the last few months we have been spectators of the tragic death of thousands desperate immigrants at the Mediterranean Sea who were trying to reach Europe Unfortunately the European countries have done nothing to prevent their death MUH TT N ATAMAN
