Railway Steel Structures Vivek Bhushan Sood, 2024-08-30

This book covers the basics of fabrication of railway steel structures. It covers the various types of steels, steel sections and structures involved along with fabrication methods. Further, some basics of design, handling and launching of fabricated components are covered, including case studies covering the consequences of errors or shortcuts adopted during fabrication. The latest trends in steel construction, adoption of steel for fast-paced construction, pre-engineered structures and use of steel for station redevelopment projects are also covered. This book aims to help the reader deliver economical and good quality structures speedily without time and cost overruns. This book introduces readers to the advantages and challenges of using steel as a material for railway bridges and other structures. It covers instructions and practices for fabrication of railway steel bridges, duly linking with other aspects like design and erection to provide a 360° view. It reviews the latest developments in the field, including new materials, fabrication techniques and types of structures being adopted. It includes case studies to underline the importance of good fabrication practices and consequences of ignoring the same. This book is aimed at civil and mechanical engineering professionals connected with fabrication and erection of railway steel structures.

Design, Fabrication and

Economy of Metal Structures Károly Jármai, József Farkas, 2013-03-15. These are the proceedings of the International Conference on Design, Fabrication and Economy of Metal Structures held on 24-26 April 2013 in Miskolc, Hungary, which contain 99 papers covering Structural optimization, Thin-walled structures, Stability, Fatigue, Frames, Fire, Fabrication, Welding technology, Applications, Steel-concrete composite, Special problems. The authors are from 23 different countries, ensuring that the themes covered are of worldwide interest and importance. The International Institute of Welding (IIW), the International Society of Structural and Multidisciplinary Optimization (ISSMO), the T-MOP 4.2.1-B.10.2-KONV 2010/0001 project entitled 'Increasing the quality of higher education through the development of research, development and innovation program at the University of Miskolc', supported by the European Union, co-financed by the European Social Fund and many other sponsors, helped organizers to collect these valuable studies, the results of which will provoke discussion and provide an important reference for civil and mechanical engineers, architects, researchers and structural designers and fabricators, as well as managers in a range of industries including building, transport, shipbuilding, aircraft, chemical and offshore engineering.
