**Dynamic Investigation of Static Divergence: Analysis and Testing** Jennifer Heeg,2000 The phenomenon known as aeroelastic divergence is the focus of this work The analyses and experiment presented here show that divergence can occur without a structural dynamic mode losing its oscillatory nature Aeroelastic divergence occurs when the structural restorative capability or stiffness of a structure is overwhelmed by the static aerodynamic moment This static aeroelastic coupling does not require the structural dynamic system behavior to cease however Aeroelastic changes in the dynamic mode behavior are governed not only by the stiffness but by damping and inertial properties The work presented here supports these fundamental assertions by examining a simple system a typical section airfoil with only a rotational structural degree of freedom Globecom ,2001
