## Description

### 4098-9733E heat sensors

4098-9733E heat sensors are self-restoring and provide rate compensated, fixed temperature sensing, selectable with or without rate-of-rise temperature sensing. The sensor's thermistor measures the local temperature for analysis at the FACU.

Figure 1: 4098-9733E heat sensor mounted in a standard size base

Figure 2: 4098-9733E heat sensor mounted in a sounder base

### Temperature selection

Rate-of-rise temperature detection is selectable at the FACU for either 15°F (8.3°C) or 20°F (11.1°C) a minute. Fixed temperature sensing is independent of rate-of-rise sensing and programmable to operate at 135°F (57.2°C) or 155°F (68°C). In a slow-developing fire, the temperature may not increase rapidly enough to operate the rate-of-rise feature. However, an alarm initiates when the temperature reaches its rated fixed temperature setting.

### Utility device temperature monitoring

Utility device temperature monitoring can be programmed to monitor for temperature extremes in the range from 32°F to 155°F (0°C to 68°C). This feature can provide freeze warnings or alert to HVAC system problems. Refer to specific FACUs for availability.

### Digital communication of analog sensing

Sensor bases contain integral addressable electronics that monitor analog information from the detachable heat sensors. Each sensor's information is digitized and transmitted to the system FACU approximately every four seconds using Simplex addressable communications. The FACU processes the information to evaluate for pre-selected alarm levels or other off-normal conditions.

### Sensor alarm and trouble LED indication

Each sensor base's LED pulses to indicate communications with the FACU. If the FACU determines that a sensor is in alarm or has some other type of trouble, the details are annunciated at the FACU and that sensor base's LED is turned on steadily. During a system alarm, the FACU controls the LEDs so that an LED that indicates a trouble returns to pulsing to help identify the alarmed sensors.
