
ASE A1- Engine Repair Test

A compression test shows that one cylinder is too low. A leakage test on that cylinder shows that there is excessive leakage. During the test, air could be heard coming from the tailpipe. Which of the following could be the cause?

- A. Broken piston rings
 - B. Bad head gasket
 - C. Bad exhaust gasket
 - D. An exhaust valve not seating - ✓✓
- The correct answer is D. If an exhaust valve is not seating, air will leak from the combustion chamber by way of the valve out to the tailpipe and make an audible sound. Broken rings or a bad head gasket would have air leaking through the oil filler or cooling system.

Technician A says that main bearing oil clearance can be checked with plastigage. Technician B says that main bearing oil clearance can be checked with a dial bore gauge. Who is right?

- A. Technician A only
 - B. Technician B only
 - C. Both A and B
 - D. Neither A or B - ✓✓
- The correct answer is C, both technicians are right. Either method can be used to check main bearing oil clearance.

Which of the following is NOT a method of correcting excessive valve stem-to-guide clearance?

- A. Knurling the valve stem

Resources in Education ,1987 **Cornell Instructional Materials Catalog** New York State College of Agriculture and Life Sciences. Department of Education. Instructional Materials Service,1992 Vocational Special Needs Michelle Sarkees-Wircenski,John L. Scott,1985 Abstract This text discusses the planning and management of vocational training programs for handicapped and disadvantaged students who have special needs The book is divided into 12 modules each covering a specific area of vocational special needs education Each module is self contained and may be studied independently of other modules Topics include referral identification and placement of special needs learners vocational assessment and individualized education programs for special needs learners interagency collaboration and cooperative planning applying rehabilitation technology to vocational programs instructional techniques for special needs learners learner evaluation and grading procedures and transition job placement and follow up for special needs learners

Reskilling America Katherine S. Newman,Hella Winston,2016-04-19 From Katherine Newman award winning author of No Shame in My Game and sociologist Hella Winston a sharp and irrefutable call to reenergize this nation s long neglected system of vocational training After decades of off shoring and downsizing that have left blue collar workers obsolete and stranded the United States is now on the verge of an industrial renaissance Companies like Apple BMW Bosch and Volkswagen are all opening plants and committing millions of dollars to build products right here on American soil The only problem we don t have a skilled enough labor pool to fill these positions which are in many cases technically demanding and require specialized skills A decades long series of idealistic educational policies with the expressed goal of getting every student to go to college has left a generation of potential workers out of the system Touted as a progressive egalitarian institution providing opportunity even to those with the greatest need the American secondary school system has in fact deepened existing inequalities leaving behind millions of youth especially those who live in the de industrialized Northeast and Midwest without much of a future at all We can do better argue acclaimed sociologists Katherine Newman and Hella Winston Taking a page from the successful experience of countries like Germany and Austria where youth unemployment is a mere 7% they call for a radical reevaluation of the idea of vocational training long discredited as an instrument of tracking The United States can prepare a new high performance labor force if we revamp our school system to value industry apprenticeship and rigorous technical education By doing so we will not only be able to meet the growing demand for skilled employees in dozens of sectors where employers decry the absence of well trained workers we will make the American Dream accessible to all Popular Science ,1989-08 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Popular Mechanics** ,1965-10 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home
