Small Scale Poultry Farming Razzab Shaikh, 2014-12-27 Small scale poultry production is an obvious and well documented opportunity for poor farmers to start an income generating activity Poultry are cheap easy to rear and easy to manage Consequently there has been and there is a growing attention and interest in poultry production in villages as well as in peri urban and urban areas throughout the developing world However existing manuals and books either give advice on industrial production systems using improved imported breeds under highly controlled conditions or very simple field guides giving little useful advice on how to rear poultry with profit in mind at village level This manual is based on existing knowledge on how to improve village poultry production systems with relatively few inputs This manual will exclusively deal with free range systems consisting of small flocks of indigenous chickens or their crosses and smallholder flocks of improved or hybrid commercial chickens Poultry production can be divided into four sectors 1 industrial and integrated 2 commercial high biosecurity 3 commercial low biosecurity 4 village and family or backyard poultry The focus here is largely on sectors 3 and 4 but there may be some overlap Family poultry as defined by the International Network for Family Poultry Development covers sectors 3 and 4 which encompass small scale poultry production There are numerous poultry handbooks which cover sectors 2 and 3 but this hand book has attempted in two manuals to cover mainly sector 3 while not ignoring the great importance of biosecurity particularly in the face of highly pathogenic avian influenza H5N1 It is envisaged that given time some producers now in sector 3 may move into sector 2 The two manuals are pitched at two different levels The Trainer's instructor manual assumes that the trainer has qualifications and or experience in a branch of agricultural science but not necessarily in poultry production Some of the material included is beyond that necessary to give an initial course in poultry production but may be useful as the farmer progresses from sector 3 to sector 2 The trainee's manual has numerous illustrations and is aimed at a lower level than for the trainer The farmer may be interested in starting

a poultry enterprise or is already producing poultry in a small scale commercial or semi commercial opportunistic situation but would like to make poultry farming more permanent The course will allow the farmer to increase his her knowledge and skills and to become aware of a number of important issues e g managing the environment disease surveillance of his her enterprise In order to minimise repetition there is some material in the trainee s manual that is not in the trainer s manual Trainers should familiarise themselves thoroughly with both manuals The third manual is for the millions of families worldwide in low income developing countries who keep backyard poultry mainly unmanaged with few inputs but nevertheless are of great importance by providing some security income and high quality protein It is hoped that this manual will make families aware of the possibility of improving output with a minimum of input Much of the information has been taken from a range of sources as well as the author s own experience of working in several developing countries over 25 years Ideally there should be a small scale demonstration unit or a poultry farm available so that the trainees can see first hand and better understand the main points in these manuals and observe how commercial poultry production should be practiced The importance of community poultry farming is seen as a critical step in alleviating poverty of household poultry keepers empowering women increasing income and moving from a scavenging system to one that is likely to be sustainable

Village Chicken Production Systems in Rural Africa Aichi J. Kitalyi, Food and Agriculture Organization of the United Nations, 1998-01-01 The poultry production systems of Africa are mainly based on the scavenging indigenous chickens found in virtually all villages and households in rural Africa These systems are characterized by low output per bird Nevertheless over 70 percent of the poultry products and 20 percent of animal protein intake in most African countries come from this sector Therefore increased rural poultry production would result in a positive impact on household food security both in increased dietary intake and in income generation This study coincided with the World Food Summit held at FAO Rome from 13 to 17 November 1996 where delegations committed their governments and civil society to a global attack on food insecurity and poverty Poultry like other short cycle animal stock is viewed by the FAO Special Programme for Food Security SPFS as a crucial element in the struggle for sustained food production and poverty alleviation The guidelines provided in this study are particularly pertinent to those countries participating in the SPFS where village chicken production will have a substantial impact on increased household food security and gender equity Foreword *Small-Scale Poultry Production* Sam Peterson, 2021-01-14 Keeping poultry makes a substantial contribution to household food security throughout the developing world It helps diversify incomes and provides quality food energy fertilizer and a renewable asset in over 80 percent of rural households Small scale producers are however constrained by poor access to markets goods and services they have weak institutions and lack skills knowledge and appropriate technologies The result is that both production and productivity remain well below potential and losses and wastage can be high However adapted breeds local feed resources and appropriate vaccines are available along with proven technologies that can substantially improve productivity and

income generation These book target the more vulnerable households especially those affected by natural disasters HIV Aids and conflict This manual provides a comprehensive and valuable technical guide for those in government service or aid agencies wishing to embark on projects that exploit the potential of small scale poultry production to improve the livelihoods of the rural poor All aspects of small scale poultry production are discussed in this book including feeding and nutrition housing general husbandry and flock health Regional differences in production practices are described

Family poultry farming in Bosnia and Herzegovina, and Georgia Food and Agriculture Organization of the United Nations, Alders, R., 2025-02-08 This report explores the impact of rural poultry production on the livelihoods of smallholders in Bosnia and Herzegovina and Georgia While contrasting perspectives between producers and ag vet suppliers were documented the research indicates that poultry production significantly contributes to the well being of these communities in Europe and Central Asia In Georgia there is potential for substantial improvements in family poultry production and knowledge among producers and suppliers Conversely Bosnia and Herzegovina presents a more intricate challenge requiring time to overcome direct and indirect hurdles to enhance the conditions of rural households The report identifies a critical need for improved collaborations between government entities suppliers and producers especially in disease surveillance for poultry It underscores the absence of comprehensive data on the causes of poultry mortality which affects producers of all scales Addressing vaccine preventable diseases through well structured vaccination programmes could not only curb poultry loss but may also bolster confidence in human vaccines Furthermore the paper highlights the necessity of establishing robust cold chains vaccination protocols and responsible use of antimicrobials which are vital for the long term success of supplier enterprises and consumer trust The study also suggests that enhancing community awareness about the nutritional benefits of chicken and eggs could significantly improve food security particularly for vulnerable groups such as women and children The involvement of women in poultry related activities varied between Bosnia and Herzegovina and Georgia prompting the need for initiatives that cater to local needs and the ambitions of producers and suppliers The report outlines specific recommendations for supporting smallholder poultry producers with a focus on gender inclusive practices over the following 18 months and the subsequent three years including the establishment of farmer groups and training in various aspects of poultry husbandry

Achieving sustainable production of poultry meat Volume 1 Steven C. Ricke, 2017-01-01 To meet growing demand the FAO has estimated that world poultry production needs to grow by 2.3% per year to 2030 Much of the increase in output already achieved has been as a result of improvements in commercial breeds combined with rearing in more intensive production systems However more intensive systems and complex supply chains have increased the risk of rapid transmission of animal diseases and zoonoses Consumer expectations of sensory and nutritional quality have never been higher At the same time consumers are more concerned about the environmental impact of poultry production as well as animal welfare Drawing on an international range of expertise this book reviews research on safety quality and sustainability issues in poultry production Part 1 discusses risks from pathogens detection and safety management on farms and in slaughterhouse operations Part 2 looks at ways of enhancing the flavour colour texture and nutritional quality of poultry meat Finally the book reviews the environmental impact of poultry production

Achieving sustainable production of poultry meat Volume 1 Safety quality and sustainability will be a standard reference for poultry and food scientists in universities government and other research centres and companies involved in poultry production It is accompanied by two further volumes which review poultry breeding nutrition health and welfare
