Parallel Computing:

Fundamentals And Applications - Proceedings Of The International Conference Parco99 Erik H D'hollander, Gerhard R Joubert, F J Peters, Henk Sips, 2000-05-31 This millennium will see the increased use of parallel computing technologies at all levels of mainstream computing Most computer hardware will use these technologies to achieve higher computing speeds high speed access to very large distributed databases and greater flexibility through heterogeneous computing These developments can be expected to result in the extended use of all types of parallel computers in virtually all areas of human endeavour Compute intensive problems in emerging areas such as financial modelling and multimedia systems in addition to traditional application areas of parallel computing such as scientific computing and simulation will stimulate the developments Parallel computing as a field of scientific research and development will move from a niche concentrating on solving compute intensive scientific and engineering problems to become one of the fundamental computing technologies This book gives a retrospective view of what has been achieved in the parallel computing field during the past three decades as well as a prospective view of expected future developments a MultiMedia Modeling Ichiro Ide, Ioannis

 Grammar Luc Steels, 2011-12-07 Construction Grammar is enthusiastically embraced by a growing group of linguists who
 find it a natural way to formulate their analyses But so far there is no widespread formalization of construction grammar with
 a solid computational implementation Fluid Construction Grammar attempts to fill this gap It is a fully operational
 computational framework capturing many key concepts in construction grammar The present book is the first extensive
 publication describing this framework In addition to general introductions it gives a number of concrete examples through a
 series of linguistically challenging case studies including phrase structure case grammar and modality The book is suited
 both for linguists who want to know what Fluid Construction Grammar looks like and for computational linguists who may
 want to use this computational framework for their own experiments or applications **Computer Vision - ECCV 2016**
