Energy Efficiency in Buildings José Manuel Andújar, Sergio Gómez Melgar, 2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is responsible for more than 30% of emissions or about 900 million tons of CO₂ per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed

Green Intelligent Transportation Systems Wuhong Wang, Klaus Bengler, Xiaobei Jiang, 2017-07-10 These proceedings collect selected papers from the 7th International Conference on Green Intelligent Transportation System and Safety held in Nanjing on July 1 4 2016 The selected works which include state of the art studies are intended to promote the development of green mobility and intelligent transportation technology to achieve interconnectivity resource sharing flexibility and higher efficiency They offer valuable insights for researchers and engineers in the fields of Transportation Technology and Traffic Engineering

Automotive and Mechanical Engineering Industrial and System Engineering and Electrical Engineering BIM Handbook Rafael Sacks, Charles Eastman, Ghang Lee, Paul Teicholz, 2018-07-03 Discover BIM A better way to build better buildings Building Information Modeling BIM offers a novel approach to design construction and facility management in which a digital representation of the building product and process is used to facilitate the exchange and interoperability of information in digital format BIM is beginning to change the way buildings look the way they function and the ways in which they are designed and built The BIM Handbook Third Edition provides an in depth understanding of BIM technologies the business and organizational issues associated with its implementation and the profound advantages that effective use of BIM can provide to all members of a project team Updates to this edition include Information on the ways in which professionals should use BIM to gain maximum value New topics such as collaborative working national and major construction clients BIM standards and guides A discussion on how various professional roles have expanded through the widespread use and the new avenues of BIM practices and services A wealth of new case studies that clearly illustrate exactly how BIM is applied in a wide variety of conditions Painting a colorful and thorough picture of the state of the art in building information modeling the BIM Handbook Third Edition guides readers to successful implementations helping them to avoid needless frustration and costs and take full advantage of this paradigm shifting approach to construct better buildings that consume fewer materials and require less time labor and capital resources Smart Trends in Computing and Communications Tomonobu Senjyu, Chakchai So-In, Amit Joshi, 2024-06-13 This book gathers high quality papers presented at the Eighth International Conference on Smart Trends in Computing and Communications SmartCom 2024 organized by Global Knowledge Research Foundation GR Foundation from 12 to 13 January 2024 in Pune India It covers the state of the art and emerging topics in information computer communications and effective strategies for their use in engineering and managerial applications It also explores and discusses the latest technological advances in and future directions for information and knowledge computing and its applications **CAA2015. Keep The Revolution Going** Stefano Campana, Roberto Scopigno, Gabriella Carpentiero, 2016-03-31 This volume brings together all the successful peer reviewed papers submitted for the proceedings of the 43rd conference on Computer Applications and Quantitative Methods in Archaeology that took place in Siena Italy from March 31st to April 2nd 2015 **Social Robotics** Miguel A. Novel & Intelligent Digital Systems: Proceedings of the 3rd International Conference (NiDS 2023) Katerina Kabassi, Phivos Mylonas, Jaime Caro, 2023-09-22 This book summarizes the research findings presented at the 3rd International Conference on Novel Intelligent Digital Systems NiDS 2023 NiDS 2023 held in Athens Greece during September 28-29 2023 under the auspices of the Institute of Intelligent Systems The conference was implemented hybrid allowing participants to attend it either online or onsite NiDS 2023 places significant importance on the innovations within intelligent systems and the collaborative research that empowers and enriches artificial intelligence AI in software development It encourages high quality research establishing a forum for investigating the obstacles and cutting

edge breakthroughs in AI The conference is designed for experts researchers and scholars in artificial and computational intelligence as well as computer science in general offering them the opportunity to delve into relevant interconnected and mutually complementary fields By facilitating the exchange of ideas the conference strengthens and broadens the network of researchers academics and industry representatives

Building Energy Modeling with OpenStudio Larry Brackney, Andrew Parker, Daniel Macumber, Kyle Benne, 2018-05-15 This textbook teaches the fundamentals of building energy modeling and analysis using open source example applications built with the US DOE's OpenStudio modeling platform and EnergyPlus simulation engine Designed by researchers at US National Laboratories to support a new generation of high performance buildings EnergyPlus and OpenStudio are revolutionizing how building energy modeling is taught in universities and applied by professional architects and engineers around the world The authors all researchers at National Renewable Energy Laboratory and members of the OpenStudio software development team present modeling concepts using open source software that may be generally applied using a variety of software tools commonly used by design professionals The book also discusses modeling process automation in the context of OpenStudio Measures small self contained scripts that can transform energy models and their data to save time and effort They illustrate key concepts through a sophisticated example problem that evolves in complexity throughout the book The text also examines advanced topics including daylighting parametric analysis uncertainty analysis design optimization and model calibration Building Energy Modeling with OpenStudio teaches students to become sophisticated modelers rather than simply proficient software users It supports undergraduate and graduate building energy courses in Architecture and in Mechanical Civil Architectural and Sustainability Engineering

SketchUp to LayOut Matt Donley, 2014-01-31 The SketchUp to LayOut book is the essential guide for woodworkers carpenters architects contractors builders and designers who already know the basics on how to use SketchUp but are looking to create stunning presentations to visualize their ideas with their clients using LayOut Learn the workflow for creating models specifically for LayOut Before you even begin modeling that first rectangle you'll need to fully understand which type of model you should be building for LayOut Don't make the mistake of creating twice the amount of work for yourself because you didn't properly organize your model ahead of time I'll teach you how to save time and frustration by organizing your model so YOU are in control of how your model viewports look The entire first half of the book is dedicated to preparing your model for LayOut From organizational workflow to scenes and styles I share with you my 5 point method I use to visualize and prepare every scene I create for LayOut Not only will you understand exactly what those five points are you'll learn multiple ways to control them Using these methods you will gain complete control over the look of your viewports in LayOut You will master every aspect of a SketchUp scene and style to enable you to create impressive presentations and drawings in the least amount of time possible Is this too advanced for me This book is designed for construction professionals who don't have any prior experience in LayOut at all But it's also structured in a way that lets you look up specific tasks or

methods without having to read the book cover to cover I'll save you all the time and frustration that I went through when I first learned LayOut by quickly orienting you with the workspace then jumping right in to creating your own titleblock inserting SketchUp models and adding dimensions You should have some basic knowledge on how to use SketchUp But if you're just starting out you'll have complete access to my entire library of tutorials and videos for free on my website to bring you up to speed quickly Every important aspect of LayOut is explained in the book with step by step instructions for you to follow along Learn exactly what you need to know and skip over all the little details you don't need to worry about The book has been updated for 2014 so you'll even learn about the new Auto Text tag feature saving you a ton of time on those redundant text edits You'll see REAL examples The sample projects in the book are real projects not hypothetical meaningless shapes and boxes so you can see exactly how to apply the concepts you learn in context with the real world Plus the SketchUp and LayOut files are included with each book download so you'll be able to follow along and discover for yourself how to organize a similar project of your own The sample projects include a woodworking table project a kitchen project and a three story house project At the same time each step by step instruction can be read and followed independently from the project So if you need to go back and reference a certain part of the book to learn how to do something specific you'll be able to do that too Advanced Techniques I've consulted with many of the best SketchUp gurus in the world I've hung out with Nick Sonder at the SketchUp basecamp conference I've interviewed Aidan Chopra SketchUp evangelist and author of Google SketchUp for Dummies Eric Schimelpfenig from SketchThis.net and Alexander Schreyer author of Architectural Design with SketchUp I've also consulted with Mike Brightman author of The SketchUp Workflow for Architecture Daniel Tal author of Rendering In SketchUp and many other great SketchUp experts
