Roberts, 2020-07-24 This book provides descriptions and illustrations of cutting edge text analysis methods for communication and marketing research cultural historical comparative and event analysis curriculum evaluation psychological diagnosis language development research and for any research in which statistical inferences are drawn from samples of texts Although the book is accessible to readers having no experience with content analysis the text analysis expert will find substantial new material in its pages In particular this collection describes developments in semantic and network text analysis methodologies that heretofore have been accessible only among a smattering of methodology journals The book's international and cross disciplinary content illustrates the breadth of quantitative text analysis applications These applications demonstrate the methods utility for international research as well as for practitioners from the fields of sociology political science journalism communication computer science marketing education and English This is an ecumenical collection that contains applications not only of the most recent semantic and network text analysis methods but also of the more traditional thematic method of text analysis In fact it is originally with this volume that these two relational approaches to text analysis are defined and contrasted with more traditional thematic text analysis methods The emphasis here is on application The book's chapters provide guidance regarding the sorts of inferences that each method affords and up to date descriptions of the human and technological resources required to apply the methods Its purpose is as a resource for making quantitative text analysis methods more accessible to social science researchers

Content Analysis of Verbal Behavior Louis A. Gottschalk, Fernando Lolas, Linda L. Viney, 2012-12-06 The psychological states of patients with diabetes mellitus were compared with those of patients suffering from other chronic diseases and people with no diagnosed chronic diseases These states were assessed by applying content analysis scales to transcripts of their descriptions of their current experiences Analyses of the diabetics scale scores revealed a pattern characterized by much anxiety depression anger expressed both directly and indirectly together with feelings of helplessness The sources of anxiety which proved to be of most importance to them were fears of death and bodily mutilation as well as guilt and shame They experienced little sense of sharing with most people around them although they showed considerable enjoyment of close relationships with family and friends This pattern of psychological states did not vary with the sex of the patients or whether they were interviewed in a hospital or at home nor with recency of onset or multiplicity of health problems It was similar to the pattern of patients with other chronic diseases but differed significantly from that of the healthy group Acknowledgment The authors wish to acknowledge the contribution of Carol Preston to the collection and analysis of these data which were made available in part by patients of the Wollongong Hospital and members of the Illawarra Branch of the Diabetic Association of New South Wales References 1 Strong JA Baird JD 1971 Diseases of the
