Practiceopolis: Stories from the Architectural Profession Yasser Megahed, 2020-07-30 This is a graphic novel about the contemporary architectural profession in which it acts as the protagonist in the form of an imaginary city called Practiceopolis The novel narrates quasi realistic stories that exaggerate the architectural everyday and the tacit in order to make them prominent and tangible They depict and dramatise the value conflicts between the different cultures of practising architecture and between the architectural profession and other members of the building industry as political conflicts around the future of Practiceopolis The book uses the metaphorical world of Practiceopolis to provoke big questions about everyday routines in the profession that practitioners may take for granted and to examine different ideologies at work among architects and other members of the construction industry The novel ends in the tradition of dystopian worlds common in a certain strand of graphic novels By vividly illustrating and narrating the critical issues he interrogates the author has created a world which any architect student or professional will both instantly recognise and simultaneously reject provoking the reader to challenge themselves and the profession at large

**BOOK JACKET** Preservation Education Barry L. Stiefel, Jeremy C. Wells, 2014-09-02 Over the past twenty years there

has been a fundamental shift in the institutional organization of historic preservation education Historic preservation is the most recent arrival in the collection of built environment disciplines and therefore lacks the pedagogical depth and breadth found in allied endeavors such as architecture and planning As the first degree programs in preservation only date to the 1970s and the first doctoral programs to the 1990s new faculty are confronted with pedagogical challenges that are unique to this relatively nascent field Based on a conference that included educators from around the world Barry L Stiefel and Jeremy C Wells now present a collection that seeks to address fundamental issues of preservation pedagogy outcome based education and assessment and global issues of authenticity and significance in historic preservation The editors argue that the subject of the analysis has shifted from What is the best way to fix a historic building to What are the best ways for teaching people how to preserve historic properties and why according to the various standards that have been established This important reconsideration of the state of the field in historic preservation education will appeal to a broad audience across numerous disciplines

**How Drawings Work** Susan Piedmont-Palladino, 2018-12-17 How Drawings Work cheekily explains that what architects make is information that enables other people to make buildings That information comes in a variety of forms drawings by hand and computer models both physical and virtual and words as needed The book reflects in witty prose on the nature of architectural drawings as tools of communication pulling from a diverse and eclectic landscape of theories from grammar functional linguistics philosophy art criticism science fiction popular culture and of course architecture to propose a new way to think about architectural communication

**Mapping the Global Architect of Alterity** Michael Jenson, 2014-03-21 Due to globalization cultural spaces are now developing with no tangible connection to geographical place The territorial logic traditionally used to underpin architecture and envision our built environment is being radically altered forcing the adoption of a new method of conceptualizing space geography and what constitutes architectural practice Construction techniques design sensibilities and cultural identities are being transformed as technology transports us to places that were previously unreachable The resultant globalized architect must become more than just an artful visionary but also a master of the art of the political nudge willing to act within multiple mediums and at the simultaneous scales of a chaotic new world disorder Though fearless they must also be responsible inherently understanding the necessity to align bold visions with the mundane details of the everyday in ways that are culturally flexible and accepting of change The potential for what must be considered the legitimate practice of the architect must move from a purely material venue to one more directly engaged in the chaos of the larger economic political and social spheres of a globalizing world The issues and possible interactions with globalization contained in this text exemplify ways that architecture is transforming into a more flexible and fluid interdisciplinary version of its traditional self in order to rise to challenges of this new international terrain A theme runs throughout in the form of a call that architects must conceptually re construct their frames of reference to better align with the demands of a rapidly globalizing world

materials and an increasing integration of designers in fabricating architecture a proliferation of recent publications from both practice and academia explore the pragmatics of materiality and its role as a protagonist of architectural form Yet as the ethos of material pragmatism gains more popularity theorizations about the poetic imagination of architecture continue to recede Compared to an emphasis on the design of visual form in architectural practice the material imagination is employed when the architect thinks matter dreams in it lives in it or in other words materializes the imaginary As an alternative to a formal approach in architectural design this book challenges readers to rethink the reverie of materials in architecture through an examination of historical precedent architectural practice literary sources philosophical analyses and everyday experience Focusing on matter as the premise of an architect's imagination each chapter identifies and graphically illustrates how material imagination defines the conceptual premises for making architecture      **Architecture** ,1995
