Revisiting Targeting in Social Assistance

Margaret Grosh, Phillippe Leite, Matthew Wai-Poi, Emil Tesliuc, 2022-06-02 Targeting is a commonly used but much debated policy tool within global social assistance practice *Revisiting Targeting in Social Assistance A New Look at Old Dilemmas* examines the well known dilemmas in light of the growing body of experience new implementation capacities and the potential to bring new data and data science to bear The book begins by considering why or whether or how narrowly or broadly to target different parts of social assistance and updates the global empirics around the outcomes and costs of targeting It illustrates the choices that must be made in moving from an abstract vision to implementable definitions and procedures and in deciding how the choices should be informed by values empirics and context The importance of delivery systems and processes to distributional outcomes are emphasized and many facets with room for improvement are discussed The book also explores the choices between targeting methods and how differences in purposes and contexts shape those The know how with respect to the data and inference used by the different household specific targeting methods is summarized and comprehensively updated including a focus on big data and machine learning A primer on measurement issues is included Key findings include the following Targeting selected categories families or individuals plays a valuable role within the framework of universal social protection Measuring the accuracy and cost of targeting can be done in many ways and judicious choices require a range of metrics Weighing the relatively low costs of targeting against the potential gains is important Implementing inclusive delivery systems is critical for reducing errors of exclusion and inclusion Selecting and customizing the appropriate targeting method depends on purpose and context there is no method preferred in all circumstances Leveraging advances in technology ICT big data artificial intelligence machine learning can improve targeting

accuracy but they are not a panacea better data matters more than sophistication in inference Targeting social protection should be a dynamic process
