Feature Films in English Language Teaching Britta Viebrock, 2016-07-11 *Feature Films in English Language Teaching* deals with the use of motion pictures in the advanced EFL English as a foreign language classroom. It provides a general introduction to film literacy and explains the rationale, methods and objectives of working with feature films. In addition, the book contains in-depth considerations on sixteen selected films which are grouped regionally: Australia, New Zealand, South Africa, USA, Great Britain. Each chapter describes the topical focus of the film and its central theme and provides background information on social, historical, political and geographical issues. A profound analysis of selected scenes lays the foundation for considerations on the teaching potential of the film. In a download section, the chapters are complemented with ready-to-use teaching materials on film-specific aspects: narrative, dramatic and cinematographic dimensions, which are organised as pre-while-post viewing activities. A glossary on technical terms for film analysis completes the volume. **Leonard Maltin's**

Brammer, Gongqiang Yu, Thomas Schenk, Fabian Haas, 2017-09-01 ISO 5349 developed by ISO Technical Committee ISO TC 108. Mechanical vibration and shock is the generic standard for the measurement and assessment of human vibration exposure. Ever since it was originally published in 1986, this standard has been unclear in its assessment of repeated isolated shocks. The current version of ISO 5349-1:2001 states in its scope that the time dependency for human response to repeated shocks is not fully known. Caution is therefore advised in the application of this part of ISO 5349 to such vibration: isolated

shocks In response to an initiative on the part of the ISO TC 108 Technical Committee a workshop was held at the 13th International Conference on Hand Arm Vibration in Beijing in 2015 for the purpose of determining the current state of knowledge concerning exposure to repeated isolated shock vibration caused by machinery and tools and its pathophysiological and epidemiological assessment and evaluating gaps in knowledge in the interests of future research activity This report contains the papers presented at the workshop Part I provides an overview of the results of the workshop and of details of two papers Part II contains a research report containing background information on two further papers presented at the workshop
