**Mergent International Manual** ,2003      **Moody's Industrial Manual** ,1989 Covering New York American regional stock exchanges international companies      **Dental Caries** ,2018-09-19 This book provides information to the readers starting with the history of oral hygiene manners and modern oral hygiene practices It continues with the prevalence and etiology of caries and remedy of caries through natural sources Etiology of secondary caries in prosthetic restorations and the relationship between orthodontic treatment and caries is addressed An update of early childhood caries is presented The use of visual tactile method radiography and fluorescence in caries detection is given The book finishes with methods used for the prevention of white spot lesions and management of caries      Neuro-Geriatrics Babak Tousi,Jeffrey Cummings,2017-12-06 This manual takes a multidisciplinary approach to neurological disorders in the elderly Comprehensive and practical it includes the most recent diagnostic criteria and immediately accessible visual care paths including the latest pharmacologic and non pharmacologic interventions Covering a range of modalities from the importance and impact of each disease to diagnostic criteria genetics laboratory and imaging findings treatment and care paths this book focuses on neurological conditions that occur commonly in older persons or which have a striking effect on their lives The common types of dementias Parkinson s disease and related disorders rapidly progressive diseases seizure disorders and multiple sclerosis are covered Issues commonly affecting this population such as neurobehavioral symptoms and caregiver issues are discussed Neuro Geriatrics A Clinical Manual is aimed at any physician who treats the elderly with neurological disorders neurologists geriatricians and geriatric psychiatrists both specialists and general practitioners      United States Government Publications Monthly Catalog ,1949      **Psychomotor Symptomatology in Psychiatric Illnesses** Manuel Morrens,Sebastian Walther,2015-12-10 Psychomotor symptoms are those symptoms that are characterized by deficits in the initiation execution and monitoring of movements such as psychomotor slowing catatonia neurological soft signs NSS reduction in motor activity or extrapyramidal symptoms EPS These symptoms have not always received the attention they deserve although they can be observed in a wide range of psychiatric illnesses including mood disorders psychotic disorders anxiety disorders pervasive developmental disorders and personality disorders Nevertheless these symptoms seem to have prognostic value on clinical and functional outcome in several pathologies In the late 19th century the founding fathers of modern psychiatry including Kahlbaum Wernicke Kraepelin and Bleuler had a strong focus on psychomotor abnormalities in their description and definitions of psychiatric illnesses and systematically recognized these as core features of several psychiatric pathologies Nevertheless emphasis on these symptoms has reduced substantially since the emergence of psychopharmacology given the association between antipsychotics or antidepressants and medication induced motor deficits This has resulted in the general idea that most if not all psychomotor deficits were merely side effects of their treatment rather than intrinsic features of the illness Yet the last two decades a renewed interest in these deficits can be observed and

has yielded an exponential growth of research into these psychomotor symptoms in several psychiatric illnesses This recent evolution is also reflected in the increased appreciation of these symptoms in the DSM 5 As a result of this increased focus new insights into the clinical and demographical presentation the etiology the course the prognostic value as well as treatment aspects of psychomotor symptomatology in different illnesses has emerged Still many new questions arise from these findings This research topic is comprised of all types of contributions original research reviews and opinion piece with a focus on psychomotor symptomatology in a psychiatric illness especially research focusing on one or more of the following topics the clinical presentation of the psychomotor syndrome the course through the illness the diagnostical specificity of the syndrome the underlying neurobiological or neuropsychological processes new assessment techniques pharmacological or non pharmacological treatment strategies
