

**Definition:** A person's perception of the quality of his or her own life (subjective) and the quality of his or her environment (objective) as perceived by the person.

**QUESTION** A 60-year-old male with a 20-year history of type 2 diabetes mellitus presents with a 2-week history of increasing fatigue, weight loss, and decreased appetite. He reports frequent urination and increased thirst. Physical examination reveals a BMI of 22 kg/m<sup>2</sup>, tachycardia, and mild dehydration. Laboratory studies show a hemoglobin A1c of 10.5%, serum glucose of 250 mg/dL, and serum ketones of 2+.

**ANSWER** The patient's symptoms and laboratory findings are consistent with uncontrolled type 2 diabetes mellitus. The high hemoglobin A1c and serum glucose levels indicate chronic hyperglycemia, while the presence of ketones suggests a degree of insulin deficiency. The patient's weight loss and increased thirst are also consistent with this condition. The appropriate management would involve initiating or adjusting insulin therapy, along with lifestyle modifications and close monitoring of blood glucose levels.
