Modeling Guidance and Goal Modeling *Software Business* Michael A. Cusumano, Bala Iyer, N. Venkatraman, 2014-07-08

This book contains the refereed proceedings of the Third International Conference on Software Business ICSOB held in Cambridge MA USA in June 2012. The software business refers to commercial activities in the software industry aimed at generating revenues from the design, delivery and maintenance of software products and IT services to enterprises and individual customers as well as from digital content. Although this business shares common features with other knowledge intensive markets, it carries many inherent features making it a challenging domain for research. The 20 full and 10 short papers accepted for ICSOB were selected from 60 submissions and are organized in sections on software product management, organizational transformation, industry transformation, software platforms and ecosystems, and emerging trends.

Computational Forensics Sargur N. Srihari, Katrin Franke, 2008-08-15. This Lecture Notes in Computer Science LNCS volume contains the papers presented at the Second International Workshop on Computational Forensics IWCF 2008 held August 7-8, 2008. It was a great honor for the organizers to host this scientific event at the renowned National Academy of Sciences Keck Center in Washington DC USA. Computational Forensics is an emerging research domain focusing on the investigation of forensic problems using computational methods. Its primary goal is the discovery and advancement of forensic knowledge involving modeling, computer simulation, and computer-based analysis and recognition in studying and solving forensic problems. The Computational Forensics workshop series is intended as a forum for researchers and practitioners in all areas of computational and forensic sciences. This forum discusses current challenges in computer-assisted forensic investigations and presents recent progress and advances. IWCF addresses a broad spectrum of forensic disciplines that use computer tools for criminal investigation. This year's edition covers presentations on computational methods for individuality studies, computer-based 3D processing and analysis of skulls and human bodies, shoe print preprocessing and analysis, natural language analysis, and information retrieval to support law enforcement analysis, and group visualization of speech recordings, scanner and print device forensics, and computer-based questioned document and signature analysis.

Discourse, Identity and Legitimacy Majid KhosraviNik, 2015-09-15 This book is a critical study of the ways that discourses of the national Self and Other are invoked and reflected in the reporting of a major international political conflict Taking Iran's nuclear programme as a case study this book offers extensive textual analysis comparative investigation and socio political contextualisation of national identity in newspaper reporting In addition to providing comprehensive accounts of theory and methodology in Critical Discourse Analysis the book provides a valuable extensive discussion of journalistic practice in Iranian and British contexts as well as offering insights into historical development of discourses in place in Iran Across four separate chapters major national and influential newspapers from both countries are critically analysed in terms of their micro linguistic and

macro discursal content and strategies The book is a vital source for interdisciplinary scholarship and will appeal to students and researchers across the critical social sciences particularly those in linguistics media and communication studies journalism and international politics *Resources in Education* ,1997 *Proceedings of the 2023 2nd International Conference on Social Sciences and Humanities and Arts (SSHA 2023)* Mohd Fauzi bin Sedon,Intakhab Alam Khan,Mehmet CÜNEYT BİRKÖK,KinSun Chan,2023-06-29 This is an open access book With the progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc
