Systems ,1987 **British Naval Weapons of World War Two** Norman Friedman,2020-07-30 John Lambert was a
renowned naval draughtsman whose plans were highly valued for their accuracy and detail by modelmakers and enthusiasts
By the time of his death in 2016 he had produced over 850 sheets of drawings many of which have never been published
These have now been acquired by Seaforth and this is the third of a planned series of albums on selected themes reproducing
complete sheets at a large page size with an expert commentary and captioning The initial volumes concentrate on British
naval weaponry used in the Second World War thus completing the project John Lambert was working on when he died His
interest was always focused on smaller warships and his weapons drawings tend to be of open mountings the kind that
present a real challenge to modelmakers rather than enclosed turret guns but he also produced drawings of torpedo tubes
underwater weapons fire control directors and even some specific armament related deck fittings Following the earlier
volumes on destroyer and escort armament this one covers the multitude of weapons carried by Coastal Forces many of
which were improvised ad hoc or obsolescent but eventually leading to powerful purpose designed weaponry An appendix
covers the main deck guns carried by British submarines of this era The drawings are backed by introductory essays by
Norman Friedman an acknowledged authority on naval ordnance while a selection of photographs adds to the value of the
book as visual reference Over time the series will be expanded to make this unique technical archive available in published
form a move certain to be welcomed by warship modellers enthusiasts and the many fans of John Lambert s work
Technical Abstract Bulletin , U.S. Naval Training Bulletin ,1950 **Italian Assault Craft, 1940-1945** Erminio
Bagnasco,2024-10-01 In stark contrast to the rather modest performance of its large surface fleet in the Second World War
the Italian Navy s smallest units achieved its most spectacular successes It made a specialty of unconventional methods of
attack explosive motor boats human torpedoes and miniature submarines that were employed with ingenuity and daring to
surprise discomfort and baffle the enemy In December 1941 the whole balance of the naval war in the Mediterranean was

altered by six frogmen riding three of the SLC craft they called maiale pigs who penetrated Alexandria harbor to cripple the battleships Valiant and Queen Elizabeth surely one of the most impressive ratios of results to resources in naval history This book is the first complete history of these craft both the details of the technology and the history of their deployment Beginning in the Great War with the extraordinary jumping boats designed to scale harbor boom defenses the story takes in the inter war development of both lightweight surface craft and underwater systems from small submarines to Gamma assault divers By way of comparison equivalent developments in other navies are analyzed including the British chariots which were little more than copies of the Italian SLCs Every operation by these craft is described cataloging the forces involved and the results from high profile successes like the sinking of the cruiser York by explosive motorboat to lesser known incidents the use of such craft by the Israelis as late as 1948 for example Many were carried out by the famous Decima MAS a unit as legendary in Italy as the SAS in Britain and this book provides a comprehensive chronicle of their activities Originally commissioned by CABI Cattaneo that designed and built most of these craft Italian Assault Craft benefited from unrestricted access to the company s archives technical drawings and photo collection so it is replete with rarely seen illustrations Very much secret weapons in their day they are here revealed in full detail for the first time
