Interaction, Language Use, and Second Language Teaching Thorsten Huth, 2020-09-01. This book presents a view of human language as social interaction, illustrating its implications for language learning and second language teaching. The volume advocates for researchers, practitioners, and administrators to rethink and reconceptualize an understanding of language beyond that of the written word to one encompassing social and interactional activity built on co-construction, collaboration, and negotiation. The book emphasizes the ways in which this view of language can shed light on the language learning process as one which draws on discrete linguistic units and constructions in conjunction with a range of temporal, sequential, and embodied resources across a variety of social contexts. In turn, these insights prompt further reflection and discussion on their implications for advancing second language teaching practice.
